Prime Tier Coaching Data

The FoCoCo Prime Tier provides a comprehensive and highly personalized mental performance coaching experience through advanced data capture and sophisticated AI integration.

The coaching content and delivery are meticulously adapted to the user's VARK learning profile (Visual, Aural, Read/Write, Kinesthetic) across the three core pillars: Focus, Confidence, and Control.

Required Coaching Data - FOCUS Pillar:

- **Mental Cue Usage Tracking:** Detailed logging of specific cues (e.g., Deep Breath, Trigger Word, Spot Focus) used during rounds, including frequency, context (pre-shot, post-shot, between-shots), and associated outcomes.
- **Mindset Rating per Round/Segment:** Granular 5-level check-in system to rate focus levels during specific holes or segments of a round, allowing for trend analysis.
- **Hole-by-Hole Performance Data:** Opt-in detailed tracking of Fairway Hit (Yes/No), Green in Regulation (Yes/No), Putts Taken, Sand Save (Yes/No), Up & Down (Yes/No), Distance, and Missed Direction to correlate with focus levels.
- **Performance Summary Data:** End-of-round summaries that capture overall mental performance and link to specific instances of focus or distraction.
- **Journal Entries:** Freeform reflections where users can detail their focus experiences, challenges, and breakthroughs, which the AI analyzes for patterns.

- **AI Insight Summaries:** AI-generated insights specifically highlighting patterns in focus, such as "loss of focus on specific holes" or "improved focus during pressure moments".
- **Customizable Performance Metrics:** Trend graphs and detailed breakdowns of performance metrics that can be analyzed in conjunction with mental states (e.g., putts per segment tied to focus rating).
- **Challenge/Mistake Response:** Data on how users respond to adversity, indicating resilience and ability to regain focus after errors.
- **Intended Strategy Focus:** User input on their planned mental strategy for a round, allowing the AI to assess adherence and effectiveness.
- **AI-Driven Segment Summaries:** Summaries for 3-hole segments, including mindset, cues used, and physical stats to pinpoint focus fluctuations.

Required Coaching Data - CONFIDENCE Pillar:

- **Mindset Rating Trend Analysis:** Historical trends of mindset ratings to identify periods of high/low confidence and correlating factors.
- **Challenge/Mistake Response:** Detailed logging of how users respond to bogeys, missed shots, or pressure situations, indicating resilience.
- **Performance Metrics (Physical):** Fairways Hit, GIR, Putts Taken, Sand Saves, Up & Downs, Penalty Strokes to identify strengths and areas for confidence building.
- **"Mind Index" Coaching Score:** A proprietary metric combining mental and physical performance to provide a holistic view of confidence.
- **Pre-Shot Routine Consistency:** Tracking the adherence to pre-shot routines as a direct indicator of confidence and preparation.
- **Journal Entries:** Reflections on self-belief, overcoming setbacks, and successful moments that build confidence.
- **Pressure Moment Notes:** User-logged notes on specific pressure situations during a round and their emotional response.
- **AI-Generated Performance Summaries:** AI insights that highlight positive trends, personal strengths, and areas of improvement to boost confidence.
- **Goal Tracking:** Progress towards specific golf or mental performance goals, providing tangible evidence of improvement and building confidence.
- **Streaks Display:** Visual representation of current streaks (e.g., consecutive rounds

played, consistent routine usage) to celebrate consistency and build confidence.

Required Coaching Data - CONTROL Pillar:

- **Mindset Rating during Round:** Fine-grained mindset ratings captured throughout the round, specifically noting emotional states (e.g., Frustrated, Calm, Resilient).
- **Weather and Course Conditions:** Input on external factors to understand their impact on emotional control and strategy adherence.
- **Mental Cue Usage (for Emotional Regulation):** Tracking cues like "Reset," "Deep Breath," or "Positive Self-Talk" specifically used to manage emotions.
- **Routine Type Classification:** Logging pre-shot, post-shot, and between-shots routines to analyze their effectiveness in maintaining control.
- **Penalty/OB Strokes:** Capturing penalty strokes to identify situations where emotional control or strategy might have broken down.
- **Strategy Focus:** User input on their intended strategy for the round (e.g., "play for bogey," "aim for safe zones") and AI analysis of adherence.
- **Pressure Moment Notes:** Detailed notes on moments of high pressure and the user's emotional and strategic response.
- **AI-Generated Mental Fatigue Alerts:** AI detection of patterns indicating mental fatigue from specific holes (e.g., holes 13-15), which can impact control.
- **"Mind Index" Coaching Score:** A metric that reflects overall mental control and composure during play.
- **Reflection on Challenges/Mistakes:** User reflections on how they handled adversity and adapted their strategy or emotions.
