FoCoCo Prime Tier: Performance Review Audio - Technical & Content Specification

Feature Name: AI-Narrated Aural Performance Review for Confidence

VARK Modality: Aural (A)

Pillar: Confidence (specifically for reinforcing positive performance, internalizing achievements, and building a foundation of past successes)

Description: A Prime-tier feature providing AI-generated audio summaries of a user's successful golf rounds. Designed for Aural learners, these narrated reviews emphasize key achievements, positive statistics, and moments of confident play, allowing users to audibly relive their triumphs and internalize their capabilities, strengthening their overall self-belief.

I. Core Logic & AI Integration:

- **Data Aggregation & "Success Event" Identification:** The AI collects and analyzes detailed round data to identify specific "Success Events" and positive performance metrics. These include:
 - **Low Scores:** Personal best gross/net scores.
 - **KPI Achievements:** Rounds with high Greens in Regulation (GIR), Fairways in Regulation (FIR), low putts, high scrambling percentage.
 - **Specific Shot Highlights:** Birdies, eagles, chip-ins, long putts made.
 - **Positive Mindset Correlation:** Segments or entire rounds where the user logged "Confident," "Flow," or "Committed" mindsets.

- **Course/Hole Performance:** Consistently good performance on specific holes or courses (leveraging "Confidence Map" data).
- **AI Narration Engine (Text-to-Speech):** The AI utilizes high-quality Text-to-Speech (TTS) to generate natural-sounding, positive, and celebratory audio narratives.
 - **Voice Tone:** The voice should be encouraging, confident, and slightly celebratory.
- **AI Script Generation & Personalization:**
 - The AI dynamically generates a narrative script for each successful round summary.
 - **Script Content Focus:** The script prioritizes positive framing and confidence reinforcement.
 - **Opening:** "Congratulations on a fantastic round at [Course Name] on [Date]!"
 - **Overall Achievements:** Highlights the final score, and significant improvements (e.g., "Your lowest score this season!").
 - **Key Stats:** Narrates impressive statistical achievements (e.g., "You hit an incredible [X]% of your Greens in Regulation," "Your putting was exceptional, averaging only [Y] putts per hole").
 - **Specific Highlights:** Describes specific "Success Events" in an engaging way (e.g., "Remember that fantastic birdie on Hole [#], where your powerful drive split the fairway and you sank a 15-foot putt!").
 - **Mindset Reinforcement:** Connects performance to positive mindsets logged (e.g., "Your 'Committed' mindset clearly paid off on the back nine, where you finished strong").
 - **Closing:** Reiterates confidence and encourages future success (e.g., "This round truly highlights your capability. Carry this confidence forward!").
 - **Dynamic Insertion:** The AI seamlessly inserts user-specific data into the narrative.
- **Contextual Triggering:**
 - **Post-Round Summary:** Immediately after a successful round is logged, the app offers to play an "Audio Performance Review."

- **Dedicated "Audio Reviews" Library:** A browsable section within the **Coach** tab where users can revisit past successful round summaries.
- **AI-Prompted Nudges:** "Feeling like you need a boost? Listen to your outstanding performance review from [Date] at [Course Name]!" (Pushed notification).
- **Pre-Round Warm-up:** AI can suggest listening to a review of a past successful round on the same course or a similar one for mental preparation.

II. Content/Display Elements (Aural Emphasis):

1. Audio Player Interface:

- **Play/Pause/Skip Forward/Back (e.g., 10-15s):** Standard audio player controls.
- **Review Title:** (e.g., "Your Stellar Round at Oakwood Hills - July 5th").
- **Round Details:** Course Name, Date, Final Score displayed prominently.
- **Progress Bar:** Visual indication of the audio's duration and current playback position.
- **Background Music (Optional):** Uplifting, subtle instrumental music that fades when the AI speaks, enhancing the celebratory tone.
- **Text Transcript (Optional):** The full narrative script can be displayed on-screen, allowing users to read along.

2. Audio Review Library View:

- A list of available audio performance reviews, sorted by date or performance score.
- Ability to **"Favorite"** reviews for quick access.
- Filter reviews by course, score range, or specific achievements.

3. AI Rationale Display: When the AI suggests listening to a review, a brief textual explanation (or narrated intro) to explain *why* it's recommended based on user data.

- **Example:** "Re-listening to your 3-putt free round at Pinehurst can reinforce your putting confidence for today's challenging greens."

III. UI/UX Considerations:

- **High Audio Quality:** Crucial for Aural learners; ensure the AI TTS voice is clear, natural, and pleasant to listen to.
- **Engaging Narration:** The tone should be consistently positive, celebratory, and motivating.
- **Background Play:** Audio should continue playing even if the user navigates away or locks their device.
- **Volume Control:** Standard volume controls integrated.
- **Headphone Recommendation:** Suggest using headphones for an optimal and private listening experience.
- **Concise Summaries:** While comprehensive, the reviews should be designed to be engaging and not overly long (e.g., 2-5 minutes per round).
- **Offline Access:** Allow users to download reviews for offline listening.
- **Feedback Loop:** Simple "Did this review make you feel more confident?" prompt after listening, helping the AI refine its narrative generation.
