FoCoCo Prime Tier: Written Commitments - Technical & Content Specification

Feature Name: AI-Guided R/W Confidence Commitments

VARK Modality: Read/Write (R/W)

Pillar: Confidence (specifically for increasing accountability, solidifying intentions, fostering consistency in practice, and reinforcing belief in chosen strategies)

Description: A Prime-tier feature that provides Read/Write learners with structured prompts to formally write down their personal commitments to specific confidence-building actions, routines, or mental strategies. By articulating these intentions in writing, users enhance their sense of ownership and accountability. The AI guides the commitment process, personalizes prompts based on individual needs, and tracks adherence, reinforcing the power of consistency in building lasting confidence.

I. Core Logic & AI Integration

- **Commitment Prompt Database (Textual):** A collection of structured prompts designed to guide users in articulating clear, actionable commitments related to confidence.
 - **Prompt Categories/Templates:**
 - **Routine Commitments:** "I commit to performing my pre-shot routine with full focus on every shot for my next [X] rounds."
 - **Action Commitments:** "I commit to spending [X] minutes on putting visualization [Y] times this week."

- **Response Commitments:** "I commit to using a positive self-talk phrase immediately after any perceived poor shot during my next [Z] practice sessions."
 - **Learning Commitments:** "I commit to reading one chapter of [Recommended Book Title] this week, focusing on building trust."
 - **Debrief Commitments:** "I commit to completing a detailed R/W Performance Debrief after my next [X] rounds, specifically analyzing my confidence levels."
 - **Placeholders:** Prompts include placeholders for users to fill in specific details (e.g., "[X] minutes," "[Y] times," "[Z] rounds").
 - **Underlying Confidence Principle:** Each prompt should be linked to a core confidence-building principle (e.g., consistency, positive self-talk, process focus, learning).
- **AI Suggestion & Personalization Engine:**
 - The AI dynamically suggests relevant commitment prompts based on the user's data:
 - **User's VARK Profile (R/W):** Prioritizes written declaration.
 - **Mindset Ratings:** If the user frequently logs low confidence during pre-shot, the AI might suggest committing to a consistent pre-shot routine.
 - **Performance Data:** If the AI identifies a pattern (e.g., inconsistency in hitting fairways), it might suggest a commitment to a confidence-building routine for driving.
 - **Journal Entries/Thought Records:** If written reflections reveal a desire to change a specific habit (e.g., negative thought patterns), the AI suggests a commitment to a new positive habit (e.g., using a specific affirmation).
 - **SMART Goals:** AI can identify active confidence SMART goals and prompt commitments that directly support achieving them.
 - **Feature Usage:** If a user recently engaged with an Aural visualization session, the AI might suggest a written commitment to integrate that visualization into their next practice.
- **AI Commitment Reinforcement & Tracking:**
 - **Written Confirmation:** Once the user writes and saves a commitment, the AI displays a written confirmation (e.g., "Great! Your commitment to [Commitment Text] has been saved.").

- **Progress Tracking Integration:** The AI automatically links commitments to relevant data sources for tracking (e.g., daily check-ins for routine commitments, performance data for outcome-based commitments).
 - **Written Reminders/Nudges:** The AI sends timely, text-based notifications reminding the user of their active commitments.
 - **Written Accountability Updates:** Provides textual updates on commitment adherence (e.g., "You've successfully completed your pre-shot routine commitment for 3 out of 5 rounds!").
- **Contextual Triggering:**
 - **Dedicated "My Commitments" Section:** A prominent area within the Coach tab.
 - **Post-Lesson/Exercise:** After a user completes a guided session (Aural or R/W) aimed at confidence, the AI prompts them to make a written commitment to integrate what they've learned.
 - **Post-Round Debrief:** After a detailed reflection, the AI can ask, "Based on your debrief, what's one confidence-building action you're ready to commit to in writing?"
 - **AI-Prompted Nudges:** "Ready to solidify your mental game? Write down a new commitment to a confidence-building routine!" (Pushed notification with link to template).
 - **Weekly/Monthly Review:** As part of a larger review process, the AI prompts users to review or renew their written commitments.

II. Content/Display Elements (Read/Write Emphasis)

1. Commitment Creation Interface:

- **AI-Generated Prompt:** Clearly displays the specific commitment prompt (e.g., "I commit to...").
- **Text Input Field:** A spacious, multi-line text box for the user to write their commitment in their own words, following the prompt.
- **Guidance Text:** Brief, inline instructions from the AI on how to make the commitment specific and actionable.
- **Deadline/Frequency Input:** Fields for users to specify a target deadline or frequency for their commitment (e.g., "By [Date]," "For [X] days/weeks," "[Y] times per week").
- **"Save Commitment" / "Confirm" Button:** To finalize the written commitment.

2. **My Active Commitments View:**

- **List Display:** A clear, organized list of all active written commitments.
- **Commitment Text:** The full text of each commitment.
- **Deadline/Frequency:** Clearly displayed for each.
- **Status/Progress Indicator:** (e.g., "In Progress," "Due Soon," "Completed," "Not Started"). Can be a simple text status or a small progress bar.
- **"Mark as Complete" / "Edit" / "Archive" Buttons:** For user management.

3. **Commitment History/Archive:**

- A browsable list of all past (completed or expired) commitments.
- Option to review past commitments and their outcomes.

III. UI/UX Considerations

- **Clarity & Focus:** The interface should be uncluttered, with a clear focus on the act of writing the commitment.
- **Intuitive Text Input:** Ensure a smooth and responsive typing experience.
- **Auto-Save Functionality:** Crucial to prevent loss of user's written commitments.
- **Readability:** Optimal font choices, line spacing, and contrast for clear reading and writing.
- **Prominent Placement:** Ensure the feature is easily discoverable within the app, especially in relevant confidence-building workflows.
- **Visual Reinforcement:** A celebratory message or animation when a commitment is marked as complete.
- **Privacy:** Emphasize that commitments are personal and private.
- **Integration with Calendar/Reminders:** Option to add commitment reminders to the user's device calendar.
- **Export Functionality (Future):** Allow users to export a list of their commitments for personal records.
