FoCoCo Prime Tier: Inspirational Images - Technical & Content Specification

Feature Name: AI-Curated Visual Inspirational Gallery

VARK Modality: Visual (V)

Pillar: Confidence (specifically for emotional uplift, positive mindset reinforcement, and quick motivational boosts)

Description: A Prime-tier feature that provides AI-curated inspirational images or GIFs, overlaid with motivational quotes related to self-belief, resilience, and positive mental attitude in golf. Designed for Visual learners, this gallery serves as a quick, aesthetically pleasing source of encouragement, accessible when a confidence boost is needed.

I. Core Logic & AI Integration:

- **Content Library:** A robust library of high-quality images and GIFs.
 - **Image Themes:** Golf landscapes (sunny fairways, majestic greens), successful golf actions (swing finishes, ball flight, putts dropping), abstract positive imagery (e.g., sunrise, mountain peaks, calm water). Avoid overly aggressive or competitive imagery unless specifically requested by user profile.
 - **Motivational Quotes:** A database of concise, impactful quotes related to:
 - Self-belief ("Believe in your swing.")
 - Resilience ("Every shot is a new opportunity.")

- Positive mindset ("Stay present, play confident.")
 - Perseverance ("Success is a journey, not a destination.")
 - Focus on process over outcome ("Trust your routine.")
 - **Quote Attributes:** Tag quotes by emotion (e.g., calm, energetic, persistent), length, and specific message.
- **AI Curation & Recommendation Engine:**
 - The AI selects images/GIFs and pairs them with relevant quotes based on:
 - **User's VARK Profile (Visual):** Prioritizes visually appealing content.
 - **Current Mindset:** If the user logs "Low Confidence" or "Frustrated," the AI recommends images/quotes focused on resilience and self-belief.
 - **Recent Performance:** If the user had a challenging round, the AI might suggest quotes about learning from setbacks. If they had a great round, quotes about consistency or celebrating success.
 - **AI's Trend Engine:** Identifies overarching themes in user's mental game (e.g., chronic self-doubt, difficulty letting go of mistakes) and tailors the content over time.
 - **User Preferences:** (Future) Allow users to "favorite" images/quotes, informing future recommendations.
- **Dynamic Overlay:** The AI dynamically overlays the selected quote onto the chosen image/GIF, ensuring readability (e.g., using contrast, semi-transparent backgrounds for text).
- **Contextual Triggering:**
 - **Dedicated "Inspiration" Gallery:** A prominent section within the Coach tab.
 - **Post-Round Summary:** If a round was tough, the AI can suggest checking the gallery for a confidence boost.
 - **AI-Prompted Nudges:** "Feeling a bit challenged today? Here's some visual inspiration to lift your spirits!" (pushed as a notification).
 - **Pre-Round Warm-up:** Suggest a quick browse through 1-2 images as part of a mental preparation routine.

- **User-Initiated:** Users can access the gallery anytime they need a quick motivational lift.

II. Content/Display Elements (Visual Emphasis):

1. Image/GIF Display:

- Full-screen or near full-screen display of the image/GIF.
- High resolution and professional aesthetics.
- GIFs should be short, looping, and non-distracting (e.g., a serene golf course, a smooth swing finish).

2. Quote Overlay:

- The motivational quote prominently displayed over the image/GIF.
- **Font Choice:** Legible, appealing font that aligns with the app's branding.
- **Text Styling:** Use of bolding, italics, or varying font sizes to highlight key words.
- **Readability:** Ensure high contrast between text and background image. Consider a semi-transparent text box or outline for clarity.

3. Navigation: Simple "Next" / "Previous" arrows or swipe functionality to browse through the curated gallery.

4. "Save/Favorite" Button: Allows users to mark images/quotes they resonate with.

5. "Share" Button: Option to easily share the image/quote via social media or messaging.

6. AI Rationale (Optional): A small, subtle text overlay explaining why *this* image/quote was chosen for the user (e.g., "A reminder of resilience, based on your recent round.").

III. UI/UX Considerations:

- **Visual Dominance:** The image/GIF should be the primary focus of the screen, with minimal UI elements.
- **Seamless Transitions:** Smooth transitions between different inspirational images/GIFs.
- **Offline Access:** Potentially cache a selection of images/GIFs for offline viewing.
- **Customization:** Users might be able to select preferred themes (e.g., "Nature," "Action," "Abstract").
- **Performance:** Optimize image loading times to ensure a fluid experience.
- **Content Refresh:** The AI regularly updates the pool of available images and quotes to keep the content fresh and relevant.
- **User Contribution (Future):** Potential to allow users to submit their own inspirational images/quotes (with moderation).
