FoCoCo Prime Tier: Positive Highlight Reels - Technical & Content Specification

Feature Name: AI-Curated Visual Confidence Highlight Reels

VARK Modality: Visual (V)

Pillar: Confidence (specifically for reinforcing positive memories, building self-efficacy, and quick mood boosts)

Description: A Prime-tier feature that provides AI-curated visual summaries of a user's most successful rounds, best holes, or exceptional shots. Presented as a dynamic "highlight reel," this feature leverages graphical elements, key statistics, and positive mindset indicators to serve as a powerful confidence booster for Visual learners.

I. Core Logic & AI Integration:

- **Data Aggregation & Identification:** The AI continuously analyzes all logged rounds and hole data to identify "highlight" moments based on predefined criteria:
 - **Low Scores:** Best gross/net scores for a round or specific 3-hole segments.
 - **Exceptional Shots:** Birdies, eagles, chip-ins, long putts made (user-logged or inferred from data).
 - **Key Performance Milestones:** Rounds with highest GIR/FIR percentage, lowest putts, best scrambling.
 - **Positive Mindset Correlation:** Segments where mindset was consistently "Confident," "Flow," or "Committed."

- **Overcoming Challenges:** (If trackable) Successful recovery from a difficult lie or a challenging hole.
- **AI Curation & Selection:**
 - The AI selects a concise number of the most impactful positive moments to feature in the reel, prioritizing recent achievements or those most relevant to current goals.
 - It intelligently groups related achievements (e.g., "Your Best Putting Round").
 - The AI can also suggest these highlights based on user-reported low confidence or upcoming challenging rounds.
- **Visual Storytelling:**
 - Each "highlight" is presented as a distinct visual slide or segment within the reel.
 - Combines score, relevant KPIs, mindset emojis, and concise AI-generated commentary.
 - The sequence of highlights is designed to build a narrative of success and capability.
- **Contextual Triggering:**
 - **Confidence Dashboard:** A dedicated section where users can access their highlight reels.
 - **Pre-Round Warm-up:** AI can suggest watching a short highlight reel to boost confidence before a round, especially a challenging one.
 - **Post-Round Debrief:** After a less-than-ideal round, the AI can suggest reviewing a highlight reel as a reminder of past successes.
 - **AI-Prompted Suggestion:** "Feeling a bit down after that bogey? Let's re-energize with your top 3 birdie moments from last month!"
 - **User-Initiated:** Users can manually select and view their highlight reels anytime they need a confidence boost.

II. Content/Display Elements (Visual Emphasis):

1. Reel Header:

- **Title:** "Your Confidence Reel," "Best of [Last Month/Season]," "Top Birdies."
- **Overall Stat:** (Optional) Overall improvement summary (e.g., "Improved by 2 strokes last month!").

2. Individual Highlight Slides/Segments: Each segment represents a key moment or a summary of a great round/segment.

- **Round/Hole Information:** Clearly displayed (e.g., "Round: July 1, 2025," "Hole 14 - Par 5").
- **Score/Outcome:** Prominently displayed (e.g., "Birdie," "Net Eagle," "New Personal Best: 85").
- **Key Metrics:** Relevant KPIs for that moment (e.g., "FIR: 100%," "1-Putt," "Scramble Success").
- **Mindset Emojis:** The dominant positive mindset emoji(s) logged for that segment (e.g., 🏆🥳🎯).
- **AI Commentary:** A short, positive, and encouraging textual blurb generated by the AI:
 - "Your powerful drive, perfectly placed, set up this easy birdie!"
 - "A textbook recovery from the rough, showing your resilience and touch."
 - "This round highlights your consistent ball-striking – fantastic GIR!"
 - "That 20-foot putt was a masterclass in reading the green under pressure."
- **Visual Elements:**
 - **Dynamic Graphics:** Animations for score changes, arrows indicating positive trends, or visual representations of ball flight paths (simplified diagrams).
 - **Image Placeholders:** (Future/Advanced) If the app ever integrates with user-uploaded photos, a "hero" image from that round/hole could be displayed.
 - **Thematic Backgrounds:** Subtle, positive golf-related imagery or color gradients.

3. Overall Summary Screen (End of Reel):

- A final screen summarizing the overall positive trend or reiterating a core confidence message.
- Call to action: "Keep up the great work!", "Believe in your game!", "Ready to tackle your next challenge?".

III. UI/UX Considerations:

- **Dynamic Presentation:** The reel should transition smoothly between highlights, perhaps with subtle animations or fades.
- **Intuitive Navigation:** "Play," "Pause," "Next," "Previous" controls.
- **Full-Screen Option:** For an immersive, distraction-free viewing experience.
- **Concise Information:** Each slide should be visually digestible quickly, with minimal text.
- **Positive Tone:** All AI commentary and visual elements maintain an encouraging and celebratory tone.
- **Shareability:** Option to easily share a snapshot or a link to a curated reel (e.g., to social media, coach, friends).
- **Curated vs. User-Selected:** Option for users to view AI-curated reels, or to select specific rounds/shots to build their own.
- **Regular Updates:** The AI should periodically refresh highlight reels with new achievements.
- **Sound Integration (Optional):** Subtle, uplifting background music or golf-related sound effects (e.g., a "thwack" for a great drive, a "plop" for a holed putt) could enhance the experience, with user volume control.
