Focus. Confidence. Control.

Project: App1 - GOLF

Subject: VARK - Confidence - (K) Kinesthetic - MASTER List - Content

Version: 1.8.5

Prepared by: Dirk J. Delfortrie

Shared with: Imad Bouirmane

Date: July 7, 2025

Content for VARK (K) Kinesthetic - Confidence Pillar

1. Power Pose Instructions

- **For Each Power Pose (e.g., "The Superman," "The Confident Stance," "Open Chest Breathing"):**
 - **Pose Name:** Clear, concise title.
 - **Purpose/Benefit (Short Text):** 1-2 sentences explaining the psychological and physiological benefit (e.g., "Increases feelings of power and reduces stress hormones").
 - **Step-by-Step Instructions (Concise Text):** 3-5 bullet points outlining the physical actions.
 - **Demonstration Video/GIF:**
 - **High-quality video file (MP4, GIF):** ~15-30 seconds, looping, showing the pose from multiple angles. Focus on clear execution.
 - **Optional still images:** Keyframes from the video showing distinct steps.
 - **Key Kinesthetic Cues (Text):** 1-2 phrases emphasizing the physical sensation (e.g., "Feel your chest expand," "Sense your feet grounded").
 - **Recommended Duration (Text):** e.g., "Hold for 1-2 minutes," "Perform for 30 seconds."
 - **Best Use Context (Text):** e.g., "Pre-round in a private space," "Between holes after a challenging shot."

- **AI Tagging Keywords:** (e.g., Anxiety Reduction, Energy Boost, Focus, Self-Belief, Resilience).

2. "Feel the Confidence" Drills

- **For Each Drill (e.g., "Weight Shift for Power," "Smooth Putting Stroke Feel," "Tempo Tap Drill"):**
 - **Drill Name:** Action-oriented title.
 - **Purpose/Competence Goal (Short Text):** 1-2 sentences on the technical skill it improves (e.g., "Develops a consistent putting stroke path").
 - **Confidence Benefit (Short Text):** 1-2 sentences on how it builds confidence (e.g., "Boosts trust over short putts").
 - **Step-by-Step Instructions (Concise Text):** 3-7 bullet points outlining the physical actions of the drill.
 - **Demonstration Video:**
 - **High-quality video file (MP4, GIF):** ~30-60 seconds, clear demonstration of the drill, possibly with slow-motion or overlays highlighting key movements.
 - **Optional still images:** Keyframes.
 - **Key Kinesthetic Cues (Text & Optional Audio):** 1-3 phrases emphasizing the specific physical sensations to focus on (e.g., "Feel the clubhead accelerate through impact," "Sense the even pressure in your feet").
 - **Audio Narration (Optional, but highly recommended for K):** Short, clear voice-over guiding the user through the drill steps and kinesthetic cues.
 - **Recommended Repetitions/Duration (Text):** e.g., "Perform 10 repetitions," "Practice for 5 minutes."
 - **Best Use Context (Text):** e.g., "On the putting green," "At the driving range."
 - **AI Tagging Keywords:** (e.g., Tempo, Balance, Fluidity, Impact, Trust, Muscle Memory, Swing Path, Putting Stroke).

3. Pre-Shot Routine Checklists (Physical Focus)

- **Database of Individual Physical Steps:**
 - **For Each Step (e.g., "Walk to target," "Foot alignment," "Waggle," "Deep breath," "Set club behind ball"):**

- **Step Name/Action (Concise Text):** "Walk to ball," "Check grip," "Look at target."
 - **Kinesthetic Focus Point (Text):** 1 short sentence emphasizing the physical feeling or action (e.g., "Feel your weight balanced," "Sense the firm grip pressure," "Notice your gaze locked on the target").
 - **Optional Visual Cue (Icon/Small GIF):** A small icon or animated GIF representing the action.
 - **Purpose/Confidence Benefit (Short Text):** 1 sentence (e.g., "Grounds you and sets your intention," "Ensures proper setup for confident strike").
 - **AI Tagging Keywords:** (e.g., Focus, Calm, Commitment, Rhythm, Grounding).
- **Example Routine Sequences (for AI to recommend or for user templates):**
 - **"Full Swing Routine":** (e.g., Walk to ball -> Visualize shot -> Check alignment -> Waggle -> Deep breath -> Look at target -> Swing).
 - **"Putting Routine":** (e.g., Read break -> Practice stroke -> Walk to ball -> Set club -> Look at target -> Stroke).
 - **"Quick Reset Routine":** (e.g., Deep breath -> Shoulders back -> Look at target).
 -

4. Stress Release Techniques

- **For Each Technique (e.g., "Progressive Muscle Relaxation," "Quick Shake-Out," "Grounding Foot Press"):**
 - **Technique Name:** Clear title.
 - **Purpose/Benefit (Short Text):** 1-2 sentences (e.g., "Reduces physical tension, calms the nervous system").
 - **Step-by-Step Instructions (Concise Text):** 3-7 bullet points outlining the physical actions.
 - **Demonstration Video/GIF:**
 - **High-quality video file (MP4, GIF):** ~30 seconds to 2 minutes, clear demonstration. For PMR, a longer guided video may be needed.
 - **Optional still images:** Keyframes.
 - **Key Kinesthetic/Sensory Cues (Text & Essential Audio):** 1-3 phrases emphasizing the sensations (e.g., "Feel the tension, now the release," "Notice your feet firmly on the ground").

- **Audio Guidance (Essential):** Calming voice-over guiding the user through the technique's steps and sensory focus.
- **Recommended Duration (Text):** e.g., "30 seconds," "2 minutes."
- **Best Use Context (Text):** e.g., "Pre-round jitters," "After a frustrating shot."
- **AI Tagging Keywords:** (e.g., Anxiety, Tension, Stress, Calm, Grounding, Focus).

5. Tactile Affirmations

- **For Each Tactile Action (e.g., Chest Tap, Thigh Tap, Club Tap):**
 - **Technique Name:** (e.g., "Heartbeat Tap," "Thigh Anchor," "Club Confidence Tap").
 - **Purpose/Benefit (Short Text):** 1-2 sentences (e.g., "Physically anchors positive feelings, reduces anxiety").
 - **Step-by-Step Instructions (Concise Text):** 2-4 bullet points outlining the physical tapping/touching action.
 - **Demonstration Video/GIF:**
 - **High-quality video file (MP4, GIF):** ~10-20 seconds, looping, clearly showing the physical action.
 - **Recommended Affirmation(s) (Text):** A list of 3-5 specific, short affirmations suitable for this action (e.g., "I am calm," "I trust my swing," "I am capable"). These should be drawn from your general Affirmation Database.
 - **Audio Guidance (Essential):** Voice-over that guides the user through the tapping rhythm and prompts them to repeat the affirmation.
 - **Key Kinesthetic/Sensory Cues (Text):** 1-2 phrases (e.g., "Feel the rhythm of the tap," "Sense the solidness of the club").
 - **Recommended Repetitions/Duration (Text):** e.g., "Tap 5 times," "Repeat for 30 seconds."
 - **Best Use Context (Text):** e.g., "Before a challenging putt," "During a walk between holes."
 - **AI Tagging Keywords:** (e.g., Grounding, Anchoring, Self-Talk, Anxiety Reduction, Focus, Trust).

6. "Walk with Purpose" Exercise

- **Core Guidance Instructions:**

- **Overall Purpose (Short Text):** 1-2 sentences on why walking with purpose builds confidence.
- **Key Physical Elements (for text & video):**
 - "Head Up"
 - "Shoulders Back & Relaxed"
 - "Purposeful, Even Stride"
 - "Eyes Focused Forward (not down at feet)"
 - "Arms Swinging Naturally"
- **Benefits per Element (Short Text):** (e.g., "Head Up: Projects confidence, increases oxygen," "Shoulders Back: Releases tension").
- **Demonstration Video/GIF:**
 - **High-quality video file (MP4, GIF):** ~30-60 seconds, demonstrating a confident walk from various angles. Can be a loop.
- **Audio Guidance (Primary):** Calming voice-over that guides the user through adopting the purposeful stride, providing cues for each physical element while they walk. (e.g., "As you walk, lift your head... feel your shoulders drop and relax... maintain an even, purposeful stride...").
- **Key Kinesthetic Cues (Text & Audio):** 2-3 phrases (e.g., "Feel the ground beneath your feet," "Sense the rhythm of your steps," "Notice your chest open").
- **Best Use Context (Text):** e.g., "Between every shot," "After a frustrating hole."
- **AI Tagging Keywords:** (e.g., Composure, Reset, Focus, Rhythm, Energy, Presence, Body Language).

7. "Commitment Swing" Practice

- **Core Principle Explanation (Short Text):** 1-2 sentences defining a "Commitment Swing" (e.g., "A swing executed with 100% conviction, regardless of outcome").
- **Key Physical Elements of a Committed Swing (for text & video):**
 - "Decisive Takeaway"
 - "Full Acceleration Through Impact"
 - "Balanced Finish"
 - "Rhythmic Tempo"

- **Sensory Cues (Text & Audio):** 2-3 phrases focusing on the physical *feel* of commitment (e.g., "Feel the clubhead release," "Sense the energy flowing through impact," "Notice your body holding a balanced finish").
- **Demonstration Video (Primary Content):**
 - **High-quality video file (MP4, GIF):** ~30-60 seconds, looping, showing a perfectly committed swing/putt. Can use slow-motion or highlights.
- **Audio Guidance (Essential):** Voice-over that guides the user through the mental and physical aspects of committing to each swing/putt during a practice session.
- **Prompts for Self-Assessment (Text):** "How committed did that swing feel? (1-10)"
- **Best Use Context (Text):** e.g., "Driving range practice," "Putting green practice."
- **AI Tagging Keywords:** (e.g., Decisiveness, Trust, Flow, No Hesitation, Process Focus, Resilience).

8. Interactive Biofeedback Integration (Future)

- **This section is primarily about *technical capabilities* and *integration requirements* from your side, but *content* will be needed for:**
 - **Biofeedback Metric Explanations (Short Text):**
 - For each metric (e.g., Grip Pressure, Swing Tempo, Balance, HRV): explain *what* it is and *why* it's relevant to golf confidence in simple terms.
 - **Example:** "Grip Pressure: Too much tension restricts natural movement and can reduce clubhead speed. Optimal pressure allows fluidity and confidence."
 - **Optimal Range/Baseline Descriptions (Text):** General guidance on what constitutes a "good" range for each metric, with space for AI to personalize.
 - **Real-time Textual Cues (Short Phrases):** (e.g., "Relax grip," "Slower takeaway," "Shift weight left").
 - **Real-time Audio Cues (Short Sounds/Phrases):** (e.g., a "ding" for optimal, a "buzz" for too much pressure, "Tempo UP/DOWN").
 - **Post-Session Analysis Descriptions (Text):** How to interpret the graphs and data.
 - **Recommended Drills/Exercises:** Link these to existing "Feel the Confidence" drills or "Stress Release Techniques" that address specific biofeedback issues (e.g., high grip pressure leads to recommendation for "Relaxation Grip Drill").

General Content Requirements for all K features:

- **Voice & Tone Guide:** Ensure all text (instructions, benefits, cues) is positive, encouraging, actionable, and non-judgmental.
- **Consistency:** Maintain consistent terminology and phrasing across all features.
- **Clarity:** Prioritize very clear, simple language, especially for instructions.
- **File Naming Convention:** A consistent, logical naming convention for all video, audio, and image files.
- **Metadata:** Provide detailed metadata for each content piece to enable effective AI tagging and recommendation logic (as outlined in the individual feature specs).
