Focus. Confidence. Control.

Project: App1 - GOLF

Subject: VARK - Control - (A) Aural - MASTER List - Content

Version: 1.8.5

Prepared by: Dirk J. Delfortrie

Shared with: Imad Bouirmane

Date: July 8, 2025

Content for VARK (A) Aural - Control Pillar

1. "Guided Breathing Exercises"

- **Audio Scripts for Each Technique (Text):**
 - **Box Breathing (e.g., 4-4-4-4):** Script detailing inhale, hold, exhale, hold timings and focus points.
 - **Diaphragmatic (Belly) Breathing:** Script guiding user to breathe into their belly, focusing on expansion and contraction.
 - **4-7-8 Breathing:** Script for specific inhale (4), hold (7), exhale (8) timings.
 - **Progressive Exhale:** Script emphasizing a longer exhale.
 - **Quick Reset Breath:** Script for 1-2 rapid, focused breaths.
 - **Length Variations:** Provide scripts for varying durations (e.g., 30-sec, 1-min, 2-min, 5-min versions for each).
- **Professional Voice Over Recordings (MP3/WAV):**
 - Recordings of *all* breathing exercise scripts.
 - Specify desired voice characteristics: calm, soothing, clear, consistent pacing, empathetic tone.
- **Auditory Cues (MP3/WAV):**

- Optional: Subtle chime, gentle beat, or specific sound to mark inhale/hold/exhale transitions.
- **Ambient Soundscapes (MP3/WAV - Optional):**
 - High-quality, non-distracting background sounds (e.g., gentle ocean waves, soft forest birdsong, light rain, calm instrumental music). Provide multiple options for user choice.
- **UI Text:** Titles for each exercise, short descriptions of benefits (e.g., "Reduces anxiety, improves focus").
- **Post-Session Feedback Prompts (Text):** Questions like "How do you feel now? (Much Calmer / Slightly Calmer / No Change)."

2. "Self-Talk for Composure"

- **Self-Talk Phrases (Text):**
 - List of concise, actionable, positively-framed self-talk phrases categorized by purpose:
 - **Reset & Recovery:** "Next shot," "Let it go," "Reset and refocus."
 - **Focus & Presence:** "One shot at a time," "Stay in the present," "See the target."
 - **Confidence Affirmation:** "Trust my swing," "I've got this," "I am committed."
 - **Commitment Cue:** "Commit to the line," "Smooth and balanced."
 - Provide ~5-10 phrases per category.
- **Professional Voice Over Recordings (MP3/WAV):**
 - Recordings of *each* self-talk phrase. The voice should be calm, confident, and encouraging.
- **Purpose/Benefit Descriptions (Text):** 1-2 sentences for each phrase explaining its mental benefit and when to use it.

- **Guided Mini-Session Scripts (Text):**
 - Scripts for short audio sessions (e.g., 30 sec - 2 min) that prompt repetition of chosen self-talk phrases.
 - Include cues for breathing or internal reflection within the script.
- **Subtle Audio Cues (MP3/WAV - Optional):**
 - Very brief, gentle sounds (e.g., a soft chime, a subtle whoosh) to accompany selected phrases for reinforcement.
- **UI Text:** Phrase titles, "Listen," "Add to Favorites," "Start Session" buttons.

3. "AI-Narrated Strategy Explanations"

- **Core Strategy Principles (Text):**
 - Detailed explanations of general golf strategy for various scenarios (e.g., "Playing a Long Par 4," "Approach Over Water," "Dogleg Management," "Recovery from Trouble").
 - For each principle, include:
 - Optimal approach and rationale.
 - Common mistakes and how to avoid them.
 - Considerations for different golfer types (e.g., high vs. low handicap).
- **Professional Voice Over Recordings (MP3/WAV):**
 - Recordings of all core strategy principle explanations.
 - The voice should be clear, authoritative, knowledgeable, and calm.
- **AI Script Segmentation Rules (Logical Structure):**
 - Define how the AI will select and combine these pre-recorded segments (or dynamically generate text for TTS) based on user's current hole, performance data, and course conditions. This is a logical rule set for the developer.

- **Optional Background Ambient Sounds (MP3/WAV):**
 - Very subtle, non-distracting golf course ambient sounds (e.g., distant birds, light wind, gentle rustle of leaves).
- **UI Text:** "Listen to Strategy," "Repeat Explanation," "Save Explanation" buttons.

4. "Control Your Inner Dialogue" Audio

- **Negative Self-Talk Archetype Descriptions (Text):**
 - Identify common negative thought patterns in golf (e.g., "Catastrophizing," "Overgeneralization," "Self-Criticism," "Should Statements," "Blaming").
- **Reframing Strategies & Positive Affirmations (Text):**
 - For each negative archetype, provide effective reframing techniques and specific positive phrases to counter them.
- **Audio Session Scripts (Text):**
 - **Identification Scripts:** Guides for users to verbally identify and acknowledge their negative thoughts.
 - **Reframing Scripts:** Guides for challenging negative thoughts and replacing them with positive ones.
 - **Lengths:** Short (30 sec - 1 min) "Interrupt & Reframe" sessions; longer (3-5 min) "Deep Reframe" sessions.
- **Professional Voice Over Recordings (MP3/WAV):**
 - Recordings of all session scripts. The voice should be highly empathetic, compassionate, and guiding, but firm in challenging negative patterns.
- **Subtle Auditory Interrupt Cues (MP3/WAV - Optional):**
 - A gentle, unique sound (e.g., a soft chime, a brief "whoosh") designed to break a negative thought pattern.
- **UI Text:** Titles for sessions, descriptions, feedback prompts.

5. "Conversational AI for Emotional Management"

- **AI Coach Voice Profile (Specification):**
 - Detailed specifications for the desired AI voice (e.g., calming, confident, empathetic, clear pronunciation, natural rhythm, male/female preference if applicable). This will guide TTS engine selection.
- **Initial Conversational Prompts (Text):**
 - Opening phrases from the AI to initiate dialogue (e.g., "How are you feeling right now?", "What's on your mind today?").
- **Empathetic Response Templates (Text):**
 - Templates for AI responses showing understanding and empathy based on detected emotions (e.g., "I hear you sound [emotion]," "It sounds like that was [challenging/frustrating].").
- **Probing Questions (Text):**
 - List of open-ended questions the AI can ask to encourage deeper verbalization (e.g., "Can you tell me more about what happened?", "What thoughts came up for you then?").
- **Actionable Advice Templates (Text):**
 - Templates for AI responses that offer specific control strategies, referencing other features:
 - "Perhaps a quick [Breathing Exercise Name] could help right now?"
 - "Let's focus on a [Self-Talk Phrase] for the next shot."
 - "What do you recall from the 'Course Strategy' for this hole?"
 - Include a wide variety of these, mapped to different emotional states and scenarios.
- **Closing/Encouragement Statements (Text):**
 - Positive closing remarks (e.g., "You've got this," "Remember to breathe and trust your plan.").

- **Conversational Flow Logic (Detailed Specification):**
 - Map out decision trees and conditional logic for AI responses based on user input, detected emotion, and current context. This is a core AI development task, but you need to provide the foundational rules and desired conversational paths.
- **Optional Background Ambient Sounds (MP3/WAV):**
 - Subtle, calming background sounds during the conversation for a focused environment.
- **UI Text:** "Talk to Coach" button, "Listening..." / "Responding..." indicators.

6. "Auditory Focus Points"

- **Auditory Cue Examples (MP3/WAV):**
 - High-quality, distinct recordings of golf-specific and environmental sounds:
 - "Clean Ball Strike" (e.g., crisp iron contact, solid driver impact, pure putt sound).
 - "Ball Landing" (e.g., soft landing on green, gentle roll on fairway).
 - "Footstep Rhythm" (consistent, measured footsteps).
 - "Club Swing Whoosh" (sound of a balanced swing).
 - "Birdsong/Wind" (ambient natural sounds for grounding).
 - "Breathing Sound" (subtle sound of deep breathing).
- **Guidance Text (for listening):**
 - For each audio cue, 1-2 sentences explaining *what* to listen for and *how* it helps mental control/present moment awareness.
 - E.g., "Focus on the precise, crisp sound of the club striking the ball. This brings you into the present moment."
- **Guided Auditory Awareness Session Scripts (Text):**

- Scripts for short audio sessions (e.g., 1-5 minutes) that guide users to practice tuning into different sounds around them.
- E.g., "Close your eyes... listen to the furthest sound you can hear... now the closest... now the sound of your own breath."
- **Professional Voice Over Recordings (MP3/WAV):**
 - Recordings of all guidance text and awareness session scripts.
- **Subtle Auditory Nudges (MP3/WAV - Optional):**
 - Very brief, gentle sounds (e.g., a quiet chime, a subtle 'whoosh') that the AI can use to prompt the user to use an auditory focus point.
- **UI Text:** Titles for cues, "Listen to Example," "Start Awareness Session" buttons.

7. "Pre-Shot Cue" Audio

- **Pre-recorded Cues (MP3/WAV)**
 - Professional, calmly narrated short audio clips for common mental pre-shot cues:
 - "Deep breath"
 - "Smooth tempo"
 - "Look at target"
 - "Trust it"
 - "Commit"
 - "Quiet hands"
 - "Stay balanced"
 - Provide ~10-15 distinct cues.
- **Guidance for User Recording (Text/Audio):**
 - Instructions for users on how to record their own cues for optimal quality (e.g., "Speak clearly and calmly," "Keep it short," "Record in a quiet place").

- **Cue Association Descriptions (Text):**
 - For each cue, describe its purpose and where it fits in a routine (e.g., "This cue reminds me to take a calm breath as I approach the ball").
- **Guided Routine Practice Scripts (Text):**
 - Scripts for audio sessions guiding users through their pre-shot routine, with placeholders for their chosen audio cues.
 - E.g., "Step 1: As you stand behind the ball, listen for your cue. [USER CUE AUDIO PLAYS]. Now, visualize your shot."
- **UI Text:** "Record My Cue," "Listen to Examples," "Assign to Routine," "Play Now" button.

8. "Emotional Regulation Storytelling"

- **Audio Narratives/Anecdotes (MP3/WAV):**
 - **Minimum 10-15 professionally produced audio stories.**
 - **Content:** True stories (or highly realistic fictionalized ones) about golfers overcoming specific emotional challenges in golf.
 - Examples: "The Major Comeback After a Triple Bogey," "Handling the First Tee Jitters at the Club Championship," "Finding Calm Amidst a Slow Round," "The Unexpected Wind and the Calm Decision."
 - **Narrative Arc:** Each story should have a clear beginning (challenge), middle (struggle, strategy application), and end (resolution/learning).
 - **Emotional Focus:** Explicitly demonstrate emotional regulation techniques in action.
 - **Varying Lengths:** From 2-3 minute anecdotes to 5-10 minute detailed stories.
- **Professional Narrator:** A compelling, engaging storyteller voice.

- **Sound Design (Optional - MP3/WAV):** Subtle background ambient golf sounds or light thematic music to enhance immersion without distracting from the narrative.
- **Key Learning Points (Text):** For each story, concisely list the main emotional regulation lessons learned.
- **UI Text:** Story titles, short summaries, "Listen Now," "Add to Favorites" buttons.
- **Reflection Prompts (Text):** Questions for the user to ponder after listening (e.g., "What emotions in this story resonated with you?", "How could you apply this golfer's strategy to your game?").

9. "Tone Analysis Feedback" (Future AI Integration)

- **AI Coach Audio Feedback Templates (Text):**
 - **Empathetic Summaries:** Templates for the AI to deliver vocal summaries of detected emotion:
 - "I heard a shift in your tone during the last part, suggesting a feeling of [frustration/anxiety/resolve]."
 - "Your voice maintained a calm and steady pace throughout, indicating good composure."
 - "The slight increase in pitch when you mentioned the putt suggests some disappointment."
 - **Actionable Recommendations:** Templates for suggesting relevant control strategies based on detected tone.
- **Audio Explanations of Vocal Cues (MP3/WAV - Optional):**
 - Short audio clips explaining how different vocal qualities (pitch, pace, volume) can indicate certain emotions.
- **UI Text:** "Analyze My Voice Tone" button, "Understanding My Tone" explanatory text.

General Content Requirements for Aural Features:

- **Consistent Voice Artist:** Highly recommended to use the same professional voice artist for all AI Coach narration and guided sessions (unless a male/female choice is offered). This creates a consistent, trusted persona.
- **High Audio Fidelity:** All audio files must be professionally recorded, mixed, and mastered to ensure clarity, optimal volume levels, and minimal background noise.
- **File Naming Convention:** A clear, consistent naming convention for all audio files (e.g., breathing_box_4444_5min.mp3, selftalk_next_shot.mp3).
- **Metadata:** Provide comprehensive metadata for each audio file (e.g., duration, associated keywords, VARK category, pillar, related features).
- **Licensing:** Ensure all audio, music, and sound effects are properly licensed for commercial use within the application.
- **Accessibility:** Consider providing text transcripts for all audio content for users with hearing impairments or for Read/Write VARK learners.
