Focus. Confidence. Control.

Project: App1 - GOLF

Subject: VARK - Control - (K) Kinesthetic - MASTER List - Content

Version: 1.8.5

Prepared by: Dirk J. Delfortrie

Shared with: Imad Bouirmane

Date: July 9, 2025

Content for VARK (K) Kinesthetic - Control Pillar

1. "Physical Reset Techniques"

- **Technique Names (Text):**
 - Tension Squeeze & Release
 - Shoulder Drop
 - Purposeful Walk
 - Grounding Foot Press
 - Hand Wring
 - Jaw Release
- **Step-by-Step Instructions (Text):** Concise, clear instructions for each technique.
 - *Example (Tension Squeeze & Release):* "Clench both fists tightly for 5 seconds, feeling the tension build in your hands and forearms. Now, slowly release, letting all tension drain away. Repeat 2-3 times."
- **Benefits (Text):** 1-2 sentences explaining the benefit of each technique.
 - *Example (Tension Squeeze & Release):* "Releases trapped physical tension, signaling to your brain that it's safe to relax."

- **Key Kinesthetic Focus Cues (Text):** What the user should *feel* during the exercise.
 - *Example (Shoulder Drop):* "Feel your shoulders melt away from your ears, creating space in your neck."
- **Contextual Application Tags (Text):** For when to use each technique.
 - *Examples:* "After a bad shot," "Before a difficult putt," "During slow play," "Feeling anxious."
- **Animated GIFs/Short Video Loops (Visual Files):** A clear, non-distracting visual demonstration (3-5 seconds, looping) for each technique, showing the physical movement.
- **UI Text:** "Quick Reset," "Physical Resets," "Start Technique," "Favorite," "How did this feel? (Options: Helpful, A Little, Not Now)."
- **AI Recommendation Rules (Logical Structure):** Define rules for when the AI suggests a technique (e.g., if Emotional Thermometer = "Angry," suggest "Tension Squeeze & Release").

2. "Feel the Course" Warm-up

- **Warm-up Exercise Names (Text):**
 - Foot Presses
 - Ankle Circles
 - Weight Shifts (Side-to-Side, Front-to-Back)
 - Heel-Toe Rock
 - Torso Twists with Club
 - Hip Swings (with or without club)
 - Arm Swings with a Feel for Arc
 - Club Swings with Controlled Pause
 - Light Grip Pressure Swings
 - Waggle Drills focusing on clubhead weight

- Full Body Shakes
 - Shoulder Rolls
 - Jaw Wiggles
- **Step-by-Step Instructions (Text):** Clear, concise instructions for each movement.
 - *Example (Foot Presses):* "Stand tall. Press all ten toes firmly into the ground, then relax. Now press the heels, then relax. Feel the full contact of your feet on the ground."
 - **Key Kinesthetic Cues (Text):** Specific prompts about *what to feel*.
 - *Example (Torso Twists):* "Feel the rotation originating from your core, with your hips following naturally."
 - **Animated GIFs/Short Video Loops (Visual Files):** Clear, looping visual demonstrations for each warm-up movement.
 - **UI Text:** "Start Warm-up," "Build My Warm-up," "My Routines," "How Connected Do You Feel? (Options: Much More, Slightly More, No Change)."
 - **AI Routine Curation Rules (Logical Structure):** Rules for how AI builds routines based on time, user weaknesses, etc.
 - *Example:* If user selects "5 min," prioritize 1-2 grounding, 1 rotational, 1 tension release.
 - **Pre-set Routine Definitions (Text):**
 - "Quick 5-min Feel" (list of exercises, durations)
 - "Full 10-min Prep" (list of exercises, durations)
 - "Balance Focus Warm-up" (list of exercises, durations)

3. "Breathing Techniques with Physical Cues"

- **Physical Cue Names (Text):**
 - Take Stance
 - Address the Ball
 - Feet Settle
 - Initiate Waggle
 - Begin Look to Target
 - Club Settles Behind Ball
 - Initiate Takeaway
 - Start Downswing
 - Watch Ball Flight
 - Walk to Ball
 - Drop Shoulders
 - Relax Grip

- **Breathing Technique Integration Rules (Logical Structure):** How each physical cue can be paired with inhale/exhale/hold from existing breathing techniques.
 - *Example (Inhale):* "As you take your stance," "As you begin your look to target."
 - *Example (Exhale):* "As you initiate your waggle," "As you initiate your takeaway."

- **Key Kinesthetic Focus Cues (Text):** What the user should *feel* when combining breath and movement.
 - *Example (Inhale with Stance):* "Feel your body gather energy as you settle your feet firmly."

- **Animated GIFs/Short Video Loops (Visual Files):** Clear, looping visuals demonstrating each physical cue.

- **Audio Guidance Scripts (Text for Voice-over):**

- *Example: "Inhale deeply... as you take your stance. Now exhale slowly... as you settle the club behind the ball."*
- **UI Text:** "Link Breath & Movement," "Practice Combo," "Build My Own Combo," "How did that feel? (Options: More Connected, Less Tense, Noticed No Change)."
- **AI Pairing Rules (Logical Structure):** Logic for recommending specific breath-movement pairings based on user data.

4. "Interactive Routine Components"

- **Routine Step Names (Text):**
 - **Mental:** Take a deep breath, Visualize shot, Commit to target, Positive self-talk, Let go of past shot, Assess risk, Feel balance.
 - **Physical:** Address the ball, Waggle, Check grip, Feel feet grounded, Shoulder roll, Jaw release, Walk with purpose, Look to target.
- **Step Purpose/Benefit Descriptions (Text):** 1-2 sentences for each step.
 - *Example (Let go of past shot): "This step helps you detach from previous errors, ensuring full focus on the present moment."*
- **Interactive Confirmation Types (Text/Logical):**
 - Tap (for quick confirmation)
 - Swipe (for transitioning/releasing)
 - Press & Hold (for sustained focus/action)
 - Double Tap (for emphasis)
- **Visual Cues for Interaction (Conceptual Description for Developer):** Describe desired animation (e.g., "Pulsing circle around button," "Arrow indicating swipe direction," "Button filling as held").
- **Haptic Feedback Specifications (Technical):**

- Define unique vibration patterns for each interaction type (e.g., short crisp tap, sustained buzz for hold).
- **UI Text:** "Build My Routine," "My Routines," "Start Routine," "Customize Interaction," "Tap to Confirm," "Swipe Here."
- **AI Routine Builder Logic (Logical Structure):** Rules for suggesting routines and interaction types based on user habits/weaknesses.

5. "Pacing Exercises"

- **Pacing Strategy Names (Text):**
 - Calm & Deliberate Pace
 - Confident & Purposeful Pace
 - Energy-Conserving Pace
 - Reset Walk
- **Instructions for Each Pace (Text):** How to physically execute each pace, emphasizing feel.
 - *Example (Calm & Deliberate Pace):* "Take slow, measured steps. Feel your feet making full contact with the ground. Synchronize your breath with each step: Inhale for two steps, exhale for two steps."
- **Key Kinesthetic Focus Cues (Text):** What to *feel* during the walk.
 - *Example (Confident & Purposeful Pace):* "Feel your shoulders relaxed, your chest open, and a gentle swing in your arms. Maintain a steady, confident rhythm."
- **Audio Metronome/Rhythm Cues (Audio Files/Specifications):**
 - Clicks or subtle tones (e.g., a "thump-thump") at specified BPMs for each pace type.
 - Optional verbal counting (e.g., "Left... Right... Left... Right").

- **Animated Visuals (Conceptual Description for Developer):** Simple animation (e.g., pulsing circle, footsteps icon) to visually represent the desired tempo.
- **Haptic Feedback Specifications (Technical):** Define unique vibration patterns for different pace types (e.g., slow pulse for calm, faster pulse for purposeful).
- **UI Text:** "Start Pacing," "Select Pace," "Adjust Pace," "How did this pace feel? (Options: Calmer, More Energized, No Change)."
- **AI Recommendation Rules (Logical Structure):** Logic for when AI suggests certain paces based on performance or emotional data.

6. "Grip Pressure Drills"

- **Drill Names (Text):**
 - Squeeze & Release Drill
 - Waggle Sensitivity Drill
 - One-Handed Pressure Check
 - Gauge Pressure Scale Drill
 - Finger Isolation Drill
 - Pre-Shot Pressure Check
- **Step-by-Step Instructions (Text):** How to perform each drill.
 - *Example (Squeeze & Release Drill):* "Hold your golf club as you normally would. Squeeze your grip tightly, feeling all the tension. Hold for 5 seconds. Now, slowly release, letting all tension drain away until your grip feels light and secure. Repeat 3 times."
- **Key Kinesthetic Cues (Text):** What to *feel* during the drill.
 - *Example (Waggle Sensitivity Drill):* "Feel the weight of the clubhead swinging freely. Notice the lightness in your hands as you waggle."

- **Animated GIFs/Short Video Loops (Visual Files):** Clear, looping visuals demonstrating the hand and arm movements for each drill.
- **Audio Guidance Scripts (Text for Voice-over):**
 - *Example: "Squeeze tightly... feel the tension build. Now release slowly... feel the lightness return to your hands."*
- **UI Text:** "Practice Grip," "Grip Drills," "Start Drill," "How did your grip feel? (Options: More Consistent, Less Tense, No Change)."
- **AI Recommendation Rules (Logical Structure):** Logic for suggesting drills based on swing issues (e.g., slice implies tight grip) or reported tension.

7. "Feel of the Outcome" Practice

- **Drill Names (Text):**
 - Perfect Putt Rehearsal
 - Controlled Drive Feel
 - Chip/Pitch Touch Rehearsal
 - Balanced Finish Drill
 - Smooth Transition Drill
- **Step-by-Step Instructions (Text):** How to physically mimic the desired movement.
 - *Example (Perfect Putt Rehearsal): "Stand over an imaginary 10-foot putt. Make a practice stroke, focusing *only* on the feel of a smooth, balanced stroke that would roll the ball perfectly into the hole. Repeat 5 times."*
- **Key Kinesthetic Cues (Text):** What to *feel* to reinforce the ideal outcome.
 - *Example (Controlled Drive Feel): "Feel the powerful yet balanced turn of your body, the club swinging freely, and the sensation of striking the center of the clubface with effortless power."*

- **Animated GIFs/Short Video Loops (Visual Files):** Clear, looping visuals demonstrating the ideal full body movement or specific part of the movement for each drill.
- **Audio Guidance Scripts (Text for Voice-over):**
 - *Example: "Swing back slowly... **feel the coil**. Now, transition smoothly... **feel the uncoil and the acceleration through impact**."*
- **UI Text:** "Practice Feel," "Outcome Drills," "Start Drill," "How did that feel? (Options: More Confident, Clearer Feel, No Change)."
- **AI Recommendation Rules (Logical Structure):** Logic for recommending drills based on user performance issues or emotional challenges.

General Content Requirements for Kinesthetic Features:

- **High-Quality Visuals:** All animated GIFs/video loops should be clear, professionally produced, and loop seamlessly. They should focus on the exact movement the user needs to mimic.
- **Concise and Actionable Language:** All text, whether instructions, cues, or UI labels, should be brief, direct, and easy to understand at a glance.
- **Strong Kinesthetic Language:** Emphasize words that evoke physical sensation and feeling.
- **Audio Clarity:** If providing voice-overs or sound effects, ensure they are high quality and don't distract from the primary kinesthetic focus.
- **Consistent Tone:** Maintain a positive, encouraging, and non-judgmental tone throughout all content.
- **Metadata:** Provide tags or metadata for each piece of content (e.g., associated emotion, swing phase, equipment needed, duration).
