FoCoCo Prime Tier: Interactive Quizzes - Technical & Content Specification

Feature Name: AI-Driven Interactive Focus Quizzes

VARK Modality: Read/Write (R/W)

Pillar: Focus (supporting comprehension, retention, and application of mental strategies)

Description: Short, written quizzes integrated into learning modules or after consuming specific content (e.g., article summaries, detailed insights) for Prime Read/Write users. These quizzes test understanding of focus concepts, provide immediate written feedback, and allow the AI to assess comprehension and adapt future content delivery.

I. Core Logic & AI Integration:

- **Content Modules/Context:** Quizzes are contextually placed within or after AI-Summarized Focus Articles, Detailed AI-Generated Insights, or other learning content related to Focus.
- **Question Bank (AI-Generated & Curated):**
 - The AI maintains a dynamic question bank for focus concepts, including various question types (e.g., Multiple Choice, True/False, Short Answer, Fill-in-the-Blank).
 - Questions are drawn from the core content provided in the app's learning modules.

- **AI Question Generation:** For Prime, the AI can dynamically generate quiz questions based on the specific content the user just consumed, ensuring relevance and novelty.
- **AI Assessment & Feedback Engine:**
 - **Automated Grading:** For objective questions (MCQ, T/F), the AI provides instant grading. For short answer, it can use NLP to assess correctness against expected keywords/concepts.
 - **Personalized Written Feedback:**
 - **Correct Answers:** Reinforce understanding (e.g., "Correct! Understanding 'Present Moment Awareness' is crucial for distraction control.").
 - **Incorrect Answers:** Provide targeted explanations, referencing back to the relevant section of the content (e.g., "Not quite. Remember, 'Controlling the Controllable' focuses on internal actions, not external conditions. Revisit the 'Actionable Steps' in the previous insight.").
 - **Elaboration:** For incorrect answers, the AI can offer a brief, rephrased explanation of the correct concept.
 - **Adaptive Learning Path:** Based on quiz performance, the AI can:
 - Recommend re-reading a specific section of an article.
 - Suggest a relevant drill or checklist for practical application.
 - Prioritize future content delivery on concepts where the user showed weakness.
- **Read/Write Optimization:**
 - All questions, options, and feedback are presented in clear, concise written text.
 - Emphasizes reading comprehension and written response.
- **Contextual Triggering:**
 - **End of Module/Content:** Automatically presented at the conclusion of a relevant learning section.
 - **Coach Section:** Users can access a library of quizzes to test themselves on specific focus topics.

- **AI Recommendation:** "Ready to test your understanding of 'Pre-Shot Routine Consistency'? Take this short quiz."

II. Content Examples (AI-Generated Quiz Questions & Feedback - Read/Write Emphasis):

Below are examples of how the "Interactive Quizzes" feature would appear for a Read/Write learner:

Quiz: Understanding Focus Fundamentals

Question 1 (Multiple Choice): Which of the following best describes "Present Moment Awareness" in golf?

- a) Planning your next shot while walking to the ball.
- b) Fully engaging with the current shot, ignoring past mistakes or future outcomes.
- c) Remembering your score on every hole.
- d) Visualizing your shot before you hit it.

User Answer:

b) Fully engaging with the current shot, ignoring past mistakes or future outcomes.

AI Feedback:  **Correct!** "Present moment awareness" means dedicating your entire attention to the current task, whether it's reading a putt or executing a swing. This helps prevent distractions and maintains optimal focus.

Question 2 (True/False): "Controlling the Controllable" primarily involves trying to influence external factors like weather and playing partners.

User Answer: True

AI Feedback:  **Incorrect.** While external factors exist, "Controlling the Controllable" specifically refers to focusing *only* on internal actions and responses that are within your power (e.g., breath, routine, attitude, commitment). External elements are largely uncontrollable. Review the "Actionable Strategies" section in the 'Detailed AI Insights' on this topic.

Question 3 (Short Answer/Fill-in-the-Blank): The purpose of a "Mental Reset Protocol" after a poor shot is to _____ the past and _____ focus on the next shot.

User Answer: release, regain

AI Feedback:  **Correct!** Excellent. The goal is indeed to **release** the past and **regain** focus on the next shot, preventing mental carry-over.

Question 4 (Multiple Choice): Which of these is NOT a common symptom of a lack of focus during a round?

- a) Rushing the pre-shot routine.
- b) Overthinking swing mechanics during a competitive round.
- c) Consistently executing high-quality shots.
- d) Allowing external distractions (e.g., noise, slow play) to disrupt your rhythm.

User Answer: c) Consistently executing high-quality shots.

AI Feedback:  **Correct!** Consistently executing high-quality shots is typically a *result* of good focus, not a symptom of a lack thereof.

Question 5 (Short Answer): Name one specific technique you can use to improve your "selective attention" on the course.

User Answer: Using a "Spot Focus" drill where I pick a tiny target on my line. **AI**

Feedback:  **Correct!** That's a great example. The "Spot Focus" drill effectively narrows your attention to only the most relevant visual cue.

III. UI/UX Considerations:

- **Integrated Display:** Quizzes appear seamlessly within the Coach section's learning modules or as pop-ups after relevant content consumption.
- **Clear Question/Answer Layout:** Well-formatted text for questions and answer choices, with radio buttons/checkboxes for selection.
- **Instant Feedback:** Immediate display of "Correct" or "Incorrect" messages, along with the personalized textual explanation.
- **Progress Tracking:** Show quiz progress (e.g., "Question 2 of 5").
- **"Retake Quiz" Option:** Allow users to retake quizzes to improve their score and understanding.
- **Performance Summary:** After completing a quiz, provide a summary of correct/incorrect answers and a link to review the relevant learning material.
- **Visual Simplicity:** The interface should be clean and text-focused, minimizing distractions and allowing the R/W learner to concentrate on the written content.
