Date: July 3, 2025

FoCoCo Prime Tier: Written Strategy Planners - Technical & Content Specification

Feature Name: AI-Guided Written Focus Strategy Planners

VARK Modality: Read/Write (R/W)

Pillar: Focus (with strong ties to Course Management and Pre-Round Preparation)

Description: Interactive, text-based templates provided by the AI, enabling Prime Read/Write users to pre-plan and document their focus strategy for an entire golf round or specific challenging holes. This feature encourages thoughtful preparation, clarifies intent, and provides a written roadmap for maintaining focus.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only - For Template Generation & Analysis):**
 - User's VARK profile (strong emphasis on Read/Write preference).
 - **Course History:** Past performance (Mindset, Score, GIR, Fairways) on specific courses or holes (e.g., identifies "trouble holes" or holes where focus tends to dip).
 - **Mindset Ratings:** Historical patterns of focus, distraction, or composure.
 - **Mental Cue Usage:** Which cues have been effective or ineffective in the past.
 - **Journal Entries & Detailed Insights:** Past reflections on focus challenges or successful strategies.

- **"Intent_Focus" (Prime-only):** User's previous stated focus intentions.
- **AI's Trend Engine:** Identifies recurring focus challenges (e.g., "focus wavers on opening holes," "struggles with commitment on long par-5s").
- **AI Template Generation Engine:**
 - The AI will dynamically generate personalized planning templates based on the user's historical data and identified areas for focus improvement.
 - Templates will include specific sections for writing down:
 - Overall round focus theme.
 - Key focus cues for different scenarios.
 - Strategies for specific challenging holes.
 - Pre- and post-shot routine focus points.
 - **Read/Write Optimization:** Templates will be primarily text-based, using:
 - Clear headings, bullet points, and numbered lists.
 - Fill-in-the-blank or short-answer text input fields.
 - Prompts that guide the user's written reflection and planning.
- **AI Plan Analysis (Post-Round / Reflection):**
 - After a round where a planner was used, the AI will compare the planned focus strategy with actual logged mindset, cue usage, and performance.
 - It will provide "Detailed AI-Generated Insights" on the effectiveness of the written plan and suggest refinements for future rounds.
- **Contextual Triggering:**
 - **Pre-Round Flow:** A prominent option before starting a new round: "Plan Your Focus Strategy for This Round."
 - **Coach Section (Planners Library):** A dedicated area where users can access, create, and review past strategy planners.
 - **Post-Analysis Recommendation:** If AI detects a recurring focus issue, it might suggest, "Let's create a focus strategy planner for your next round at [Course Name] focusing on [Specific Challenge]."

II. Content Examples (AI-Generated Planner Templates - Read/Write Emphasis):

Below are examples of how the AI would generate "Written Strategy Planners," demonstrating structured, actionable text-based planning for a Read/Write learner:

1. Round Focus Strategy Planner: [Course Name] - [Date]

- **Overall Focus Theme for This Round:** (e.g., "Stay Present, One Shot at a Time")
- **Key Focus Cues for Today:**
 - Pre-Shot: "Target First" (visualize + commit)
 - During Swing: "Smooth Tempo" (feel + hear)
 - Post-Shot: "Release & Reset" (deep breath + move on)
- **Focus Points for Challenging Holes:**
 - **Hole [X] (e.g., #4, long Par 3):** Focus on club choice and confident setup. Read scorecard notes.
 - **Hole [Y] (e.g., #13, tight fairway):** Focus on a precise landing zone. "Commit to the line."
- **Mindset Management Strategy:** If frustrated, refer to "Mid-Round Reset" checklist.
- **Notes/Reminders:** (Free text area for additional personal notes)

2. Specific Hole Focus Planner: Hole [Number] - [Par] - [Yards]

- **This Hole's Primary Focus Challenge:** (e.g., "Often distracted by water on the left," or "Tendency to rush putting setup")
- **My Focus Goal for This Hole:** (e.g., "Maintain calm presence from tee to green," or "Execute full putting routine with clear intent")
- **Pre-Shot Focus Checklist (Tee Shot):**
 -  Visualize the safe zone.
 -  Confirm club choice.
 -  "Balanced start."
- **Key Mental Cues for This Hole:**
 - Before Approach: "Green in two."

- On Green: "Read it, trust it, roll it."
- **If I Make a Mistake Here:** (e.g., "Take 3 deep breaths, then physically walk off the anger.")
- **Post-Hole Reflection (to be filled in after playing):** How well did I execute my focus plan? What worked? What was challenging?

3. Practice Session Focus Planner: [Date] - Range/Course

- **Session Goal:** Improve focus on [e.g., short game, driving consistency].
- **Specific Focus Drills Today:**
 - **Putting:** "One Putt Focus Drill" (write down target for each putt).
 - **Chipping:** "Landing Zone Verbalization" (verbally commit to landing spot).
- **Mindset Intention:** "Stay patient and present."
- **Notes:** (Free text for any observations during practice)

III. UI/UX Considerations:

- **Interactive Templates:** Clearly defined text input fields (e.g., text boxes, multi-line text areas) within the planner templates.
- **Structured Layout:** Clean, organized layout with headings, bullet points, and numbered lists to facilitate easy reading and writing.
- **Saving & Archiving:** Users can save completed planners, which are then archived and accessible for review by date or course.
- **"Use This Plan" Button:** A clear call to action to link a saved planner to a specific round.
- **Printable Option:** Allow users to print out their completed planners for on-course reference.
- **AI Feedback Integration:** After a round, provide a link to "See AI's Analysis of Your Plan" within the round summary.
- **Visual Progress (Minimal):** Perhaps a subtle progress bar or checklist completion percentage if multiple sections need to be filled.
- **Pre-filled Suggestions:** (Future) AI could pre-fill some sections with suggested strategies based on past data, which users can then edit.
