FoCoCo Prime Tier: Concept Infographics - Technical & Content Specification

Feature Name: Mental Principle Infographics

VARK Modality: Visual (V)

Pillar: Focus (with strong cross-over to Confidence and Control)

Description: A library of high-quality, static infographics and visual summaries that condense complex mental game principles into easily digestible, visually appealing formats, designed to help Prime users quickly grasp and internalize key concepts related to focus, confidence, and control.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - User's VARK profile (strong emphasis on Visual preference).
 - AI's Trend Engine insights (e.g., if a user consistently logs "distraction" or "overthinking," the AI might recommend an infographic on "The Circle of Control").
 - User's specific challenges identified through journaling or AI analysis (e.g., struggling with outcome focus vs. process focus).
 - Completion of related learning modules (to reinforce concepts).
- **AI Recommendation Engine:**

- The AI will intelligently recommend relevant infographics based on the user's observed mental patterns, expressed challenges, or progress through coaching modules.
- It serves as a visual reinforcement tool for concepts introduced in other coaching modalities.
- **Content Library:** The AI will draw from a pre-defined library of infographics, each tagged by:
 - **Core Principle:** (e.g., Circle of Control, Process vs. Outcome Focus, Growth Mindset, Acceptance, Emotional Regulation, Pre-Shot Rituals).
 - **Related Pillar(s):** Focus, Confidence, Control.
 - **VARK Type:** Visual.
 - **Complexity Level:** (Basic, Intermediate, Advanced) to match user's progression.

II. Content & Display Elements (Visual Emphasis):

Infographics are static visual assets designed for clarity and impact, using a combination of text, icons, diagrams, and color coding.

1. "The Circle of Control" Infographic:

- **Content:** A central circle labeled "Within My Control" containing elements like "My Effort," "My Routine," "My Attitude," "My Strategy." Surrounding it, "Outside My Control" with elements like "Weather," "Opponent's Play," "Bad Breaks," "Course Conditions."
- **Visual Elements:** Distinct colors for inside/outside circles, clear icons for each element, concise bullet points.

2. "Process vs. Outcome Focus" Infographic:

- **Content:** Two distinct columns or opposing visual pathways. One side highlights "Process" with steps like "Pre-Shot Routine," "Target Focus," "Acceptance." The other side highlights "Outcome" with elements like "Score," "Winning," "Perfection."
- **Visual Elements:** Flowcharts, arrows, contrasting colors, simple illustrative icons.

3. "Components of a Solid Pre-Shot Routine" Infographic:

- **Content:** A sequential visual breakdown of a typical pre-shot routine (e.g., Visualize, Deep Breath, Aim, Commit, Execute).
- **Visual Elements:** Numbered steps, small icons for each step, clear layout for easy memorization.

4. "Mindset Scale" / "Emotional Ladder" Infographic:

- **Content:** A vertical or horizontal scale depicting different mindset states or emotions, from optimal to challenged, with brief descriptions for each.
- **Visual Elements:** Gradient color coding, emojis for each level, clear labels.

5. "Acceptance Principle" Infographic:

- **Content:** Visual metaphors for accepting bad shots (e.g., "letting go" of a balloon, a river flowing past obstacles). Focus on moving forward.
- **Visual Elements:** Abstract diagrams, simple illustrations conveying movement or release.

6. "Recalibration Techniques" Infographic:

- **Content:** Visual summaries of various techniques to regain composure after a mistake (e.g., 10-second rule, physical reset, focused breath).
- **Visual Elements:** Small illustrative icons for each technique, quick steps.

III. UI/UX Considerations:

- **Dedicated Section:** Infographics will likely reside in a browsable "Resources" section within the "Coach" tab, categorized by pillar or principle.
- **AI Integration:** They will also be recommended by the AI as contextual insights or follow-ups to journal entries/performance analyses.
- **Viewing Experience:** Ensure high-resolution display, zoom/pan functionality for detailed viewing.
- **Shareability:** (Future) Option for users to share useful infographics.
- **Concise Presentation:** Infographics should be designed to convey information quickly and effectively, leveraging visual elements to reduce text load.
