FoCoCo Prime Tier: Audio Summaries - Technical & Content Specification

Feature Name: AI-Generated Audio Round Summaries (Focus Patterns)

VARK Modality: Aural (A)

Pillar: Focus (with cross-over to Control and Confidence for overall performance insights)

Description: AI-generated audio summaries delivered via text-to-speech that provide a concise, auditory overview of a user's focus patterns during a golf round, highlighting moments of high concentration, instances of distraction, and emphasizing which mental cues or self-talk phrases were particularly effective.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - User's VARK profile (strong emphasis on Aural preference).
 - **Mindset Ratings:** Per-hole and overall round mindset check-ins.
 - **Mental Cue Usage:** Logging of specific cues applied (e.g., Deep Breath, Trigger Word, Visualization, Self-Talk).
 - **Performance Data:** Key stats correlated with focus (e.g., Fairways Hit, GIR, Putts, Penalty Strokes, Challenge Response Reflection).
 - **Journal Entries:** (If the user recorded verbal or text notes about focus).
 - **AI's Trend Engine:** Analyzes the above data to:

- Identify periods of high/low focus on a hole-by-hole or segment basis.
 - Correlate specific mental cues with positive outcomes or improved mindset.
 - Detect recurring patterns of focus disruption (e.g., "losing focus on par-3s," "distracted by slow play").
- **AI Summary Generation Engine:**
 - The AI will synthesize the analyzed data into narrative sentences.
 - It will prioritize insights related to "Focus" based on the user's VARK profile.
 - These sentences will then be converted into natural-sounding speech using Text-to-Speech (TTS) technology.
 - **Dynamic Variables:** The audio summary will dynamically insert specific data points, such as: [COURSE_NAME], [HOLES_PLAYED], [MINDSET_RATING], [FOCUS_INSIGHT], [EFFECTIVE_CUE], [SCORE_HIGHLIGHT].
 - **Contextual Triggering:**
 - **Post-Round Completion:** The primary trigger; users will be prompted to listen to their audio summary after logging a Prime-level round.
 - **Dashboard/Coach Section:** Accessible on demand from a "Round Summaries" or "Insights" section, especially beneficial for Aural learners who prefer to listen rather than read.

II. Content Examples (AI Generated - Aural Emphasis):

Below are examples of how the AI would generate "Audio Summaries," demonstrating variation and personalization for an Aural learner:

1. General Positive Focus Summary:

-  "Great round today at [**Course Name**]! Your mindset stayed consistently [**Mindset Rating, e.g., 'Calm and Composed'**], especially through holes [**Segment, e.g., '10 to 12'**]. The verbal cue [**Effective Cue, e.g., 'One Shot at a Time'**] clearly helped maintain your focus after that challenging shot on the [**Hole Number, e.g., '14th hole'**]."

2. Highlighting Focus Improvement:

-  "In today's round at **[Course Name]**, we noticed a significant improvement in your focus on the back nine. After a slight dip around hole **[Hole Number, e.g., '7']**, your consistent use of the '**[Effective Cue, e.g., 'Reset Breath']**' brought your attention back. This allowed you to finish strong, **[Score Highlight, e.g., 'parring the last three holes']** with clear focus."

3. Addressing Focus Lapses:

-  "During your round at **[Course Name]**, your focus was excellent for the first **[Number, e.g., '5']** holes. We observed some distraction during holes **[Segment, e.g., '8 and 9']**, where your mindset rating indicated a shift to **[Mindset Rating, e.g., 'Distracted']**. Remember to re-engage with your pre-shot routine and consider using '**[Recommended Cue, e.g., 'your Trigger Word']**' next time you feel your mind wandering in similar situations."

4. Emphasizing Cue Effectiveness:

-  "What stood out today, **[User Name]**, was how effectively your '**[Effective Cue, e.g., 'Commit to the Line']**' verbal cue worked on your putting. You audibly engaged with it on several key putts, resulting in a **[Performance Highlight, e.g., 'low putt count on the front nine']** and sustained focus on the greens."

5. Correlating Focus with Performance:

-  "Your round at **[Course Name]** shows a strong correlation between your mental focus and performance. On holes where your mindset was **[Mindset Rating, e.g., 'Sharp']**, you consistently hit **[Performance Highlight, e.g., 'Greens in Regulation']**. Keep that mental intensity high, and remember to '**[Recommended Cue, e.g., 'mentally review your strategy']**' before challenging shots."

III. UI/UX Considerations:

- **Prominent Audio Player:** A clear, easy-to-access audio player widget on the round summary screen or dashboard, labeled "Listen to Your Round Summary."
- **Playback Controls:** Standard play/pause, scrub bar, volume control, and potentially a "rewind 10s" button for reviewing specific insights.

- **Optional Transcript:** For a hybrid learning experience, provide a text transcript of the audio summary for users who also benefit from reading.
- **Download Option:** Allow Prime users to download their audio summaries for offline listening.
- **Concise and Engaging:** The audio summaries should be concise enough (e.g., 60-90 seconds) to be digestible but informative. The voice narration should be pleasant and engaging.
