FoCoCo Prime Tier: "Focus Log" Templates - Technical & Content Specification

Feature Name: AI-Guided "Focus Log" Templates

VARK Modality: Read/Write (R/W)

Pillar: Focus (specifically self-monitoring, pattern identification, and targeted improvement)

Description: Interactive, structured journaling templates designed for Prime Read/Write users to meticulously log specific instances of effective focus or focus breakdown during a round or practice. These templates guide users to capture details about the situation, their mental state, contributing factors, and any strategies employed, enabling deeper AI analysis and personalized insights.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only - For Template Generation & Analysis):**
 - User's VARK profile (strong emphasis on Read/Write preference).
 - **Mindset Ratings:** Specific logged "Focused," "Distracted," "Calm," "Rushed" entries.
 - **Performance Data:** Correlations between focus state and shot outcomes (e.g., missed putts after "distracted" mindset).
 - **Course & Hole Data:** Location where focus events occurred.
 - **Previous Journal Entries:** AI learns common self-reported focus issues.

- **AI's Trend Engine:** Identifies overarching focus strengths/weaknesses and recurring scenarios.
- **AI Template Generation Engine:**
 - The AI offers structured "Focus Log" templates. These aren't dynamically generated per se, but the *prompts within them* are highly informed by common focus challenges.
 - Templates guide users to systematically document:
 - The specific situation/hole.
 - Their mental state/focus level.
 - Perceived internal and external contributing factors.
 - Any mental cues or strategies attempted.
 - The outcome.
 - **Read/Write Optimization:** Predominantly text-based, using:
 - Clear, labeled sections and input fields.
 - Checkboxes or dropdowns for quick classification where appropriate.
 - Ample free-text areas for detailed written reflection.
- **AI Analysis of Focus Logs:**
 - The AI ingests the structured data and free-text entries from the "Focus Logs."
 - It uses NLP to analyze patterns across multiple entries, identifying:
 - **Specific Triggers:** What consistently causes focus to waver (e.g., "slow play," "hitting into water," "waiting on the tee").
 - **Effective Strategies:** Which cues or techniques the user logged as successful in regaining/maintaining focus.
 - **Recurring Strengths/Weaknesses:** Areas where focus is consistently strong or weak.
 - This detailed analysis directly feeds into the "Detailed AI-Generated Insights" and "Personalized Coaching Content," providing concrete examples from the user's own data.

- **Contextual Triggering:**
 - **Post-Round:** A prominent option after a round, especially if mindset ratings indicated variability.
 - **Mid-Round (Quick Log):** (Future V1.5+) A quick access button to log a specific focus instance in real-time.
 - **Coach Section (Journal/Log Library):** A dedicated section for accessing, creating, and reviewing focus logs.
 - **AI Recommendation:** "Based on your recent round, it might be beneficial to complete a 'Focus Log' for that challenging stretch on holes 10-12."

II. Content Examples (AI-Guided "Focus Log" Templates - Read/Write Emphasis):

Below are examples of "Focus Log" templates, demonstrating structured journaling for a Read/Write learner:

1. Focus Log: Incident Report

- **Date:** [Auto-filled Date]
- **Round/Practice Session:** [Dropdown: Link to specific round/session]
- **Hole/Situation:** [Text Input: e.g., "Hole #7 - after hitting into the bunker," or "During putting drill on the practice green"]
- **Type of Focus Event:** (Checkboxes)
 - ☒ Loss of Focus / Distraction
 - ☒ Maintained Strong Focus
 - ☒ Regained Focus
 - ☒ Overthinking / Indecision
 - ☒ Rushed Routine
- **My Mental State (Emoji/Text):** [Dropdown: e.g., 😡 Frustrated, 😞 Distracted, 😌 Calm, 😫 Overwhelmed]
- **Contributing Factors (Internal):** (Text Input: e.g., "Thinking about last shot," "Worried about score," "Self-doubt," "Physical fatigue")
- **Contributing Factors (External):** (Text Input: e.g., "Slow play ahead," "Noise from maintenance," "Playing partner chatter," "Windy conditions")

- **Strategies Attempted (Mental Cues/Actions):** (Text Input: e.g., "Deep Breath," "Trigger Word: Focus," "Walked away to reset," "Visualized target")
- **Outcome/Impact on Play:** (Text Input: e.g., "Hit next shot poorly," "Regained composure and made par," "Still felt rushed," "Helped me commit")
- **Lessons Learned / Future Plan:** (Text Input: What will you do differently next time?)

2. Focus Log: Positive Focus Highlight

- **Date:** [Auto-filled Date]
- **Round/Practice Session:** [Dropdown: Link to specific round/session]
- **Hole/Situation:** [Text Input: e.g., "Hole #3 - great approach shot under pressure"]
- **Type of Focus Event:** ☒ Maintained Strong Focus
- **My Mental State (Emoji/Text):** [Dropdown: e.g., ✨ Locked-In, 💪 Confident, 😌 Calm & Clear]
- **What Contributed to This Strong Focus?** (Text Input: e.g., "Clear pre-shot routine," "Positive self-talk from previous hole," "Strong visualization," "Felt calm and unhurried")
- **Mental Cues/Strategies Used:** (Text Input: e.g., "Deep breath cue," "Commit to the line," "Focused only on the target")
- **Outcome/Impact:** (Text Input: e.g., "Hit ball exactly as planned," "Felt confident throughout the swing," "Made an easy birdie")
- **Key Takeaway for Future Rounds:** (Text Input: How can I replicate this focus?)

III. UI/UX Considerations:

- **Dedicated Section:** A prominent entry point within the "Journal" or "Coach" section, clearly labeled "Focus Log."
- **Intuitive Form Fields:** Clear labels, appropriate input types (text input, checkboxes, dropdowns) for easy data entry.

- **Date/Time Stamping & Round Linking:** Automatic population of date/time and option to link to a specific logged round.
- **"Add New Entry" Button:** Clear call to action to create a new log.
- **Review & Edit:** Users can easily review, edit, and delete past log entries.
- **Search & Filter:** Ability to search/filter logs by date, focus type (good/poor), keywords in notes.
- **Visual Cues:** Use of icons (e.g., a magnifying glass for "analysis," a lightbulb for "insights") to indicate where AI-generated analysis is derived from these logs.
- **Integration with Insights:** A direct link or indication within the Detailed AI-Generated Insights that certain analyses are drawn from the user's Focus Logs.
- **Export/Print:** Ability to export or print compiled focus logs for personal review.
