FoCoCo Prime Tier: Structured Focus Checklists - Technical & Content Specification

Feature Name: AI-Generated Structured Focus Checklists

VARK Modality: Read/Write (R/W)

Pillar: Focus (specifically routine adherence and mental reset)

Description: Dynamically generated, actionable bullet-point checklists provided by the AI to guide Read/Write learners through their pre-shot routines, mid-round focus resets, and other focus-enhancing processes, emphasizing clear, scannable text instructions.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - User's VARK profile (strong emphasis on Read/Write preference).
 - **Routine Consistency Logging:** Data on user's adherence to pre-shot, post-shot, and between-shot routines.
 - **Mindset Ratings:** Instances of "rushed," "distracted," or "unclear" mindset during a round.
 - **Performance Data:** Correlation between routine execution and shot outcomes.
 - **Journal Entries:** User's written reflections on challenges with routine or focus.

- **AI's Trend Engine:** Identifies specific scenarios where the user's routine breaks down or focus wavers, prompting the need for a structured checklist.
- **AI Checklist Generation Engine:**
 - The AI will draw from a library of best practices for golf mental routines and focus techniques.
 - It will synthesize these into clear, concise, actionable bullet points, tailored to the user's specific needs and the scenario.
 - **Personalization Parameters:**
 - [ROUTINE_TYPE] Placeholder: (e.g., "Pre-Shot," "Mid-Round Reset," "Post-Mistake Protocol").
 - [SPECIFIC_STEP] Placeholder: Detailed action (e.g., "Check target," "Deep breath," "Visualize").
 - [KEY_REMINDER] Placeholder: Short mental prompt (e.g., "Stay present," "Trust the process").
 - [CONTEXT_NOTE] Placeholder: Scenario-specific advice (e.g., "for a tight fairway," "after a three-putt").
- **Contextual Triggering:**
 - **Pre-Round Planning:** As part of the user's customized mental game plan for the upcoming round.
 - **Post-Round Analysis:** If the AI detects inconsistencies in routine or focus lapses, it will recommend relevant checklists for future rounds.
 - **On-Demand:** Users can access a library of structured checklists within the "Coach" section, categorized by purpose (e.g., "Pre-Shot," "Focus Reset," "Putting Routine").
 - **Mid-Round (Future V1.5+):** A discreet notification or quick-access overlay, providing a minimalist checklist for a rapid focus reset during slow play or after a challenging hole.

II. Content Examples (AI-Generated Checklists - Read/Write Emphasis):

Below are examples of how the AI would generate "Structured Focus Checklists," demonstrating variation and personalization for a Read/Write learner:

1. Standard Pre-Shot Routine Checklist:

◦ Your Pre-Shot Focus Checklist:

-  **Target Check:** Clearly identify your target.
-  **Decision:** Confirm club choice and shot shape.
-  **Breath:** *Take one deep, cleansing breath.*
-  **Visualize:** Mentally rehearse desired ball flight & landing.
-  **Commitment:** Trust your decision and swing thought.
-  **Address:** Step in, focus on the ball, ready to swing.

2. Mid-Round Focus Reset Checklist (After a Challenging Hole):

◦ Mid-Round Reset: After Hole [Number]:

-  **Acknowledge:** *Write down what happened on the last hole (briefly).*
-  **Release:** Cross off the previous hole mentally. It's done.
-  **Re-center:** Take 3 slow, deep breaths.
-  **New Focus:** Identify ONE key mental goal for the next 3 holes.
-  **Next Shot Mindset:** Shift attention ONLY to the current shot.

3. Putting Focus Checklist (Short Putt):

◦ Short Putt Confidence Steps:

-  **Read:** Analyze line and speed.
-  **Aim:** Pick a precise spot.
-  **Pace:** Note desired roll past hole.
-  **Setup:** *Feet, eyes, shoulders aligned.*
-  **Commit:** Trust your read & stroke.

- ☒ **Execute:** Smooth, accelerating stroke.

4. **Distraction Management Checklist (During Play):**

- **Dealing with Distractions:**

- ☒ **Identify:** What is distracting you (noise, thoughts, playing partner)?
- ☒ **Acknowledge:** Mentally note it (e.g., "wind noise").
- ☒ **Re-focus:** Read your core self-talk phrase (e.g., "My bubble, my shot").
- ☒ **Breathe:** Take a deliberate breath to re-center.
- ☒ **Re-engage:** Look at target, read next step of routine.

5. **Pre-Round Mental Warm-up Checklist:**

- **Pre-Round Mental Prep:**

- ☒ **Review Goals:** Read today's mental strategy (e.g., "Stay Present").
- ☒ **Affirmation:** Write down 3 positive self-statements.
- ☒ **Visualize Success:** Mentally "play" a perfect opening hole.
- ☒ **Routine Review:** Mentally walk through your pre-shot checklist.
- ☒ **Set Intention:** "Today, I will focus on [specific mental skill]."

III. UI/UX Considerations:

- **Clean, Scannable Format:** Bullet points, clear headings, ample white space for readability.
- **Checkbox Functionality:** Digital checkboxes next to each item that users can tap to mark as complete, providing a sense of accomplishment and tracking adherence.

- **Printable Option:** For hardcore R/W learners, an option to print checklists (perhaps a minimalist version) for on-course use.
- **Customizable Checklists:** (Future) Allow Prime users to personalize or create their own checklists based on AI suggestions.
- **Contextual Access:** Checklists are easily accessible from the dashboard, Coach section, and potentially as quick-access overlays during round logging.
- **Progress Tracking:** AI can track how often users interact with/complete checklists, feeding into overall consistency metrics.
- **Integration with Journaling:** Prompt users to reflect in their journal about the effectiveness of specific checklists.
