FoCoCo Prime Tier: Graphical Trends - Technical & Content Specification

Feature Name: Mind Index & Focus Consistency Trend Graphs

VARK Modality: Visual (V)

Pillar: Focus (with strong correlation to Confidence and overall consistency)

Description: A key visual feature on the Prime Dashboard that displays trend graphs of the user's "Mind Index" score over time, allowing for a correlation with specific rounds played and providing a visual representation of their focus consistency across different periods.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - **"Mind Index" Score:** This is a proprietary metric calculated by the AI, combining various mental and physical performance data points from each round.
 - *Mental Data Inputs:* Mindset ratings (overall and per-hole), mental cue usage, routine consistency, reflection notes on focus/distraction.
 - *Physical Data Inputs:* Key performance metrics (Fairways Hit, GIR, Putts, Sand Saves, Up & Downs, Penalty Strokes) on a per-round or per-hole basis.

- **Round Metadata:** Date played, Course Name, Score, Weather/Conditions.
- **AI's Trend Engine:**
 - Calculates the "Mind Index" for each completed round.
 - Analyzes the trends in this score over weeks, months, or custom periods.
 - Identifies correlations between Mind Index fluctuations and specific round characteristics (e.g., "Mind Index dropped on rounds played in high wind," "consistent routine usage correlates with higher Mind Index").
 - Highlights significant changes or plateaus in focus consistency.
- **Trend Aggregation:** The system will aggregate data to allow viewing trends over various timeframes (e.g., last 5 rounds, last month, custom date range).

II. Content & Display Elements (Visual Emphasis):

1. **Line Graph Display:** A clear line graph showing the "Mind Index" score on the Y-axis and time/rounds on the X-axis.
2. **Interactive Data Points:** Each point on the graph will represent a completed round. Hovering/tapping on a point will display:
 - Date of the round.
 - Specific "Mind Index" score for that round.
 - Overall score for that round.
 - Course played.
 - Option to link directly to the detailed round summary or heat map for that specific round.
3. **Visual Indicators of Consistency:**
 - (Future) Moving average line to show overall trend smoothing out daily fluctuations.
 - (Future) Shaded areas to indicate periods of high consistency (e.g., tight cluster of scores) or high variability.

4. **Filter and Zoom Options:**

- **Time Range Selector:** Buttons or sliders to view trends for "Last 7 Days," "Last 30 Days," "Last 3 Months," "All Time," or a custom date range.
- **Metric Selector (Optional):** While primarily "Mind Index," (future) allow overlays of other key metrics like average putts or GIR % on the same graph for visual correlation.

5. **Correlative Insights (AI-Generated Textual Overlays/Side Panels):**

- Text snippets or a side panel that provides AI-generated insights based on the visual trend, e.g.:
 - "Your Mind Index has shown a consistent upward trend over the last month, suggesting improved overall focus."
 - "Notice the dip in Mind Index around [Date] – this correlated with increased 3-putts and a lower mindset rating that week."
 - "Your best focus consistency appears on [Specific Course Type] or [Time of Day]."

III. UI/UX Considerations:

- **Dashboard Integration:** A prominent and interactive widget within the Prime Dashboard, allowing users to quickly grasp their mental performance trajectory.
- **Clarity and Readability:** Graphs should be clean, with clear labels and intuitive scaling.
- **Interactivity:** Smooth zooming, panning, and data point interaction.
- **Visual Consistency:** Adhere to FoCoCo's established design system for charts and graphs.
- **Actionable Links:** Provide clear pathways from the trend graph to more detailed drill recommendations or specific round summaries.
