### **FoCoCo Prime Tier: Mental Imagery Cues - Technical & Content Specification**

**Feature Name:** Mental Imagery Cues **VARK Modality:** Visual (V) **Pillar:** Focus

**Description:** Dynamically generated, AI-rephrased visual prompts and tips designed to guide the user in visualizing specific outcomes, processes, or mental states to enhance focus.

#### **I. Core Logic & AI Integration:**

- **Triggering Events:**

- Post-round analysis identifies areas of focus breakdown (e.g., missed fairways on specific holes, low mindset ratings during tee shots).
- Pre-round planning where a user sets a "Focus" goal.
- User explicitly requests a "Focus" exercise.
- AI detects a pattern of high-pressure situations leading to focus issues.

- **AI Rephrasing Engine:**

- The AI will draw from a library of core mental imagery concepts (e.g., "target visualization," "perfect shot replay," "calm mindscape").

- It will rephrase these concepts into short, actionable, and personalized prompts, considering:
  - User's recent performance data (e.g., if a user struggled with driving, the prompt might focus on visualizing a straight drive).
  - User's VARK profile (ensuring emphasis on visual language).
  - Context of the current session (e.g., pre-round warm-up, mid-round reset).
- **Personalization Parameters:**
  - [TARGET] Placeholder: Replaced by specific targets (e.g., "center of the fairway," "the back of the cup," "the narrow gap between trees").
  - [SHOT\_TYPE] Placeholder: Replaced by specific shot types (e.g., "a powerful drive," "a silky smooth putt," "a controlled iron shot").
  - [EMOTION] Placeholder: Replaced by desired emotional states (e.g., "a calm presence," "focused intensity," "unwavering composure").
  - [COURSE\_CONTEXT] (Prime Only): If hole-by-hole data is available, the AI can reference specific holes or course features.

---

## **II. Content Examples (AI Generated - Visual Emphasis):**

Below are examples of how the AI would generate "Mental Imagery Cues" for a Prime user, demonstrating variation and personalization:

### **1. For Pre-Shot Focus (General):**

- "Before your swing, close your eyes for a moment. **Visualize the ball flying high and straight, landing softly right on your [TARGET].** See it perfectly."

### **2. For Recovery Shot Focus (Post-Mistake):**

- "After that last shot, take a deep breath. Now, clearly **picture your ball finding the [TARGET] for this recovery shot.** See the optimal trajectory, bypassing all obstacles, and landing precisely where you want."

3. **For Putting Focus (Short Game):**

- "On this crucial putt, take your time. **Visually trace the line from your ball to the [TARGET] (the center of the cup).** Imagine the ball rolling smoothly, dropping in with a satisfying thud."

4. **For Maintaining Calm Presence (Control Pillar Crossover):**

- "Feeling the pressure? Find a point in the distance and **visualize a calm, clear blue sky spreading across your mind.** Let that image bring a sense of [EMOTION] composure to your presence before this shot."

5. **For Driving Accuracy (Long Game):**

- "Stepping up to this par 4, take a moment to **paint a vivid picture of your [SHOT\_TYPE] (powerful drive) splitting the fairway.** See the ball soaring, finding the ideal landing zone you've targeted."

6. **For Chipping/Pitching (Around the Green):**

- "Before this chip, **visualize the arc of the ball, landing gently on the green and trickling towards the hole.** See it come to rest near your [TARGET]—a tap-in birdie!"

7. **For Overcoming a Challenge (Resilience):**

- "Recall a past time you hit a challenging [SHOT\_TYPE] perfectly. **Replay that successful shot vividly in your mind,** feeling the confidence and precision. Bring that imagery to this moment."

8. **For Course Management (Strategic Visual):**

- "On [COURSE\_CONTEXT - e.g., Hole 15 at Pebble Beach], **mentally map out your safest path to the green, avoiding the hazards on the left.** Visualize each shot's landing spot, ensuring a clean and controlled approach."

9. **For Pre-Round Warm-up (Setting the Tone):**

- "As you warm up, **visualize yourself playing a full round with [EMOTION] focus.** See yourself calmly executing each shot, staying present, and enjoying the process, regardless of outcome."

#### 10. For Post-Shot Reset (Quick Visual Cue):

- "If you hit a poor shot, immediately **picture a 'reset button' in your mind and visually press it**. Clear the screen and prepare to visualize only the next, successful shot."

---

### **III. UI/UX Considerations:**

- These cues would typically appear as brief text prompts within the Coach section, possibly accompanied by simple, relevant static imagery (e.g., a target icon, a golf ball on a tee).
- They might be presented as pop-up "tips" during a round (if enabled for Prime) or integrated into post-round AI summaries.
- The tone will be encouraging and concise, designed for quick mental application.

This structured approach ensures that "Mental Imagery Cues" are not just generic tips, but personalized, AI-driven visual guidance that actively helps the Prime user enhance their focus.
