FoCoCo Prime Tier: Performance Overlays - Technical & Content Specification

Feature Name: Performance Overlays (3-Hole Segment Summary Grid)

VARK Modality: Visual (V)

Pillar: Focus (with crossovers into Confidence and Control)

Description: A dashboard display for Prime users that visually summarizes performance and mental state over user-defined or AI-determined 3-hole segments, providing a quick visual overview of patterns related to focus, confidence, and control during a round.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):** This feature is heavily reliant on the granular data captured for Prime users, specifically:
 - Score per hole/segment.
 - Mindset ratings (5-level check-in system) per hole/segment, converted to emojis.
 - Mental Cue Usage per hole/segment.
 - Fairway Hit (Yes/No) per hole.
 - Green in Regulation (Yes/No) per hole.
 - Putts Taken per hole.

- **Segment Definition:**
 - Default: 3-hole segments (e.g., holes 1-3, 4-6, 7-9, etc.).
 - Future consideration (V1.5+): User-defined segments or AI-identified critical segments (e.g., "front 9," "back 9," "stretch of difficult holes").
- **AI Analysis & Trend Engine (Behind the Scenes):**
 - The AI's "Trend Engine" will analyze these overlays to detect patterns such as "strong start," "vulnerable finish," or "rollercoaster mid-round."
 - It can identify correlations like "mindset drops after specific holes" or "cue consistency tied to better scores." While the overlay is visual, the AI processes the underlying data to provide accompanying insights elsewhere.
- **Triggering/Access:**
 - Accessed via the "Prime Dashboard" section of the app.
 - Viewable after a round has been logged with sufficient Prime-level data.
 - Users can navigate between different rounds to view historical overlays.

II. Content & Display Elements (Visual Emphasis):

The Performance Overlay will be presented as a grid or a series of cards, with each card representing a 3-hole segment and displaying the following visual elements:

1. **Segment Indicator:** Clearly label the segment (e.g., "Holes 1-3," "Holes 4-6").
2. **Score for Segment:** The numerical score achieved for that 3-hole stretch (e.g., "+1," "Even").
3. **Mindset Summary (Emoji + Optional Trend Tag):**
 - A prominent emoji representing the dominant or average mindset during that segment (e.g., 😊 for Calm, 😐 for Neutral, 😞 for Distracted).
 - (Prime V1.5+) A small trend arrow or tag if the mindset significantly dropped or improved within that segment.

4. **Key Mental Cue(s) Used:** Icons or short text labels for mental cues logged during those holes (e.g., 🧘 for Deep Breath, 🗣️ for Self-Talk).
5. **Key Physical Stats (Optional/Toggleable for visual clarity):**
 - Fairways Hit % or count for the segment.
 - GIR % or count for the segment.
 - Putts per segment average.
6. **Visual Indicators of Performance:**
 - (Future) Color coding for the segment card background (e.g., green for excellent, red for challenging) based on a combined score/mindset metric.
 - (Future) Small bar charts or mini-graphs within the segment to show a trend for putts or GIR across the three holes.

III. UI/UX Considerations:

- **Dashboard Integration:** This feature will be a prominent section within the dedicated Prime Dashboard.
- **Visual Hierarchy:** Information within each segment overlay should be clear and scannable, with mindset emoji and score being the most prominent.
- **Interactivity:** Tapping on a segment overlay could expand it to show more granular hole-by-hole details or associated journal entries/AI insights for that specific stretch of play.
- **Comparison View:** (Future enhancement) Option to compare segment overlays from different rounds side-by-side to identify recurring patterns on specific stretches of a course.
- **Responsiveness:** The layout should adapt well to different screen sizes (mobile, tablet).
