Focus. Confidence. Control.

Project: App1 - GOLF

Subject: VARK - Focus - Visual - Pre Shot Visualization Prompts

Version: 1.8.5

Prepared by: Dirk J. Delfortrie

Shared with: Imad Bouirmane

Date: July 3, 2025

FoCoCo Prime Tier: Pre-Shot Visualization Prompts - Technical & Content Specification

Feature Name: AI-Guided Pre-Shot Visualization Prompts

VARK Modality: Visual (V)

Pillar: Focus (specifically pre-shot routine and commitment)

Description: AI-generated prompts that guide the Prime user through a detailed visual rehearsal of their entire golf shot sequence, from target acquisition to desired ball flight and landing, enhancing mental preparation, focus, and commitment before execution.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - User's VARK profile (strong emphasis on Visual preference).
 - Logged pre-shot routine consistency.
 - Performance data related to shot execution (e.g., missed targets, directional misses, inconsistent ball flight).
 - Mindset ratings (e.g., lack of commitment, overthinking during pre-shot).
 - Course details (if available, AI can reference specific holes or hazards for realism).
 - AI's Trend Engine insights (e.g., "struggles with commitment on tight tee shots," "lacks clarity on approach shot targets").

- **AI Prompt Generation Engine:**
 - The AI will dynamically create concise, sequential visualization prompts.
 - It will personalize prompts based on:
 - **User's Current Goal/Challenge:** If the user is working on driving accuracy, prompts will focus on visualizing hitting the fairway. If putting, it's about seeing the ball drop.
 - **Recent Performance:** If the user pulled shots, the AI might prompt visualization of a fade.
 - **Course Context:** (If available) Mentioning specific course features like "the bunker on the left" or "the elevated green."
 - **User's VARK sub-preferences:** Adjusting the level of detail or sensory words within the visual prompt.

- **Contextual Triggering:**
 - **Pre-Round:** As part of the user's customized mental game plan before a round.
 - **Post-Round Analysis:** Recommended as a drill to improve focus or commitment after a challenging round.
 - **On-Demand:** User can select this practice from the "Coach" section under the Focus pillar.
 - **Live Round (Future V1.5+):** A quick, silent prompt before a shot on a critical hole, pushing notification style.

II. Content Examples (AI Generated - Visual Emphasis):

Below are examples of how the AI would generate "Pre-Shot Visualization Prompts," demonstrating variation and personalization:

1. For Driving Accuracy:

- "Before your drive, close your eyes. **Clearly see your ball perfectly splitting the fairway.** Watch it fly, reaching the ideal **landing zone** you've picked. Now, **see it rolling gently to a stop**, perfectly positioned for your next shot."

2. **For Approach Shot Precision:**

- "As you stand over this iron, **visualize your ball launching, climbing high, and dropping softly onto the green.** See it spinning, coming to rest **right near the pin.**"

3. **For Putting Confidence:**

- "Take a moment. **Visualize the exact line from your ball to the center of the cup.** See the ball rolling smoothly along that line, **dropping into the hole** with perfect pace."

4. **For Chip Shot Touch:**

- "Before this chip, **picture your ball landing softly on the green, just past the fringe.** See it taking one hop, then rolling gently **towards the hole,** stopping close for an easy putt."

5. **For Recovery Shot Strategy (Contextual):**

- "From this lie, **visualize the safest path back into play.** See the ball flying low under the trees, or carving around the hazard, **landing perfectly in the fairway.**"

6. **For Controlling Draw/Fade:**

- "To hit that controlled fade, **visually rehearse the ball starting slightly left of target, then gracefully curving to land precisely on your intended line.** See the specific arc of the flight."

7. **For Handling Pressure:**

- "On this crucial shot, focus inward. **Visualize your ideal shot, calmly and confidently.** See the perfect swing, the desired **ball flight,** and the outcome you desire, unaffected by external pressure."

8. **For Pre-Shot Consistency:**

- "Each time, **see the complete sequence: from your target acquisition, to your smooth take-away, to your balanced finish.** Visualize the fluidity and power of your ideal swing."

9. **For Wind Adaptation:**

- "With this crosswind, **visualize your ball holding its line against the wind, perhaps starting a little into it, then fading or drawing gently to your target.** See its adjusted flight path."

10. **For Course-Specific Challenge (Example):**

- "On Hole 7, with the water on the right, **visualize your drive staying confidently left of the hazard.** See your **ball flight** perfectly tracking down the safe side of the fairway."

III. UI/UX Considerations:

- **Text-Based Prompts:** Primarily delivered as concise, sequential text overlays or pop-ups within the "Coach" section or as part of a pre-round routine module.
- **Minimalist Design:** Clean, uncluttered screen during the exercise to reduce visual distractions.
- **Pacing:** Prompts should appear with enough time for the user to visualize before the next instruction, potentially with user-controlled progression or AI-timed intervals.
- **Integration:** These prompts could be integrated with the "Focused Gaze" exercise or appear as standalone tips.
- **Audio Option (Future):** While visual-first, an optional gentle audio narration of these prompts could enhance the experience for some users.
