FoCoCo Prime Tier: Visual Drills - Technical & Content Specification

Feature Name: Visual Drills (Focus & Course Management)

VARK Modality: Visual (V)

Pillar: Focus (with strong connection to Control for course management)

Description: AI-recommended drills primarily involving visual learning methods such as watching video examples of ideal play (physical or mental focus) or studying strategic diagrams for effective course management, designed to enhance the user's focus and strategic control.

I. Core Logic & AI Integration:

- **Data Sources (Prime Tier Only):**
 - User's VARK profile (strong emphasis on Visual preference).
 - Performance data: Fairways Hit %, GIR %, Missed Direction, Penalty Strokes, Score (especially on strategic holes).
 - Mindset ratings (e.g., moments of distraction, loss of focus).
 - Challenge/Mistake Response (if the user identifies strategic errors).
 - AI's "Trend Engine" insights (e.g., "losing focus on tee shots," "struggling with strategic decisions on doglegs").

- **AI Recommendation Engine:**
 - The AI will cross-reference the user's performance weaknesses and mental patterns with the "Visual" learning preference.
 - It will then recommend specific drills from a curated library of visual content, dynamically selecting the most relevant one(s).
 - **Contextual Triggering:**
 - Post-round analysis: If a user struggles with a particular type of hole (e.g., tight driving holes) or consistently misses in one direction.
 - Pre-round planning: If the user indicates a focus goal related to strategic play or maintaining focus through specific hole types.
 - Proactive coaching: As part of a personalized weekly plan generated by the AI.
 - User request: User explicitly searches for "visual drills for focus" or "course management strategies."
- **Content Library:** The AI will draw from a pre-defined library of high-quality visual assets tagged by:
 - Golf skill (driving, putting, chipping, course management).
 - Mental skill (focus, control, pre-shot routine).
 - VARK type (Visual).

II. Content Examples (AI Recommended - Visual Emphasis):

Below are examples of how the AI would recommend "Visual Drills," demonstrating variation and personalization:

1. For Pre-Shot Focus (Watching Routine):

- **Recommendation:** "Watch this short video of a professional golfer executing their entire pre-shot routine with unwavering focus. Pay close attention to their eye movements and body language."
- **Visual Aid:** Embedded video player.

2. For Target Focus (Specific Aiming):

- **Recommendation:** "Here's a diagram illustrating how to pick a precise intermediate target for your drives. Visualize the line through your ball, the intermediate target, and your ultimate landing zone."
- **Visual Aid:** Interactive diagram where user can simulate target lines.

3. For Course Management (Dogleg Strategy):

- **Recommendation:** "Review this animated course map showing the optimal strategy for playing a dogleg left hole. Notice the ideal landing zones for each shot and where to avoid hazards."
- **Visual Aid:** Animated course map demonstrating shot trajectories and safe zones.

4. For Maintaining Focus After a Bad Shot:

- **Recommendation:** "Look at this infographic on 'The Circle of Control.' Visually identify what's inside and outside your control, and practice refocusing on what you can influence."
- **Visual Aid:** Infographic with clear visual distinctions between controllable and uncontrollable elements.

5. For Green Reading Focus (Putting):

- **Recommendation:** "Watch this slow-motion video demonstrating how to read a tricky breaking putt. Notice the subtle slopes and how the ball's path is affected."
- **Visual Aid:** Slow-motion video with overlaid arrows showing break.

6. For Chipping Strategy (Visualizing Landing Zones):

- **Recommendation:** "Study these diagrams showing ideal chipping landing zones based on pin position. Visualize your ball landing in these specific areas."
- **Visual Aid:** Multiple diagrams of a green with highlighted landing zones relative to pin.

7. For Visualizing a Calm Mental State:

- **Recommendation:** "When you feel tension, refer to this tranquil image of a calm golf course at dawn. Take a moment to absorb its peacefulness and bring that same calm to your mind."
- **Visual Aid:** High-resolution serene golf course photograph.

8. For Fairway Finding Focus (Driving Line):

- **Recommendation:** "Here's a diagram of a challenging driving hole. Notice the visual cues used by top pros to pick their line off the tee. Practice seeing this line in your mind."
- **Visual Aid:** Diagram of a hole with highlighted driving lines.

9. For Recovery Shot Planning (Visual Path):

- **Recommendation:** "After an errant shot, use this interactive diagram to visualize all possible recovery paths. See the safest option and mentally trace its trajectory before you decide."
- **Visual Aid:** Interactive diagram of various recovery options from a challenging lie.

10. For Routine Consistency (Visual Checklist):

- **Recommendation:** "Keep this visual checklist of your pre-shot routine steps handy. Before each shot, mentally tick off each item as you perform it, ensuring complete focus."
- **Visual Aid:** Infographic/checklist with icons for each step (e.g., breath icon, target icon).

III. UI/UX Considerations:

- **Integration:** Visual drills will be accessible within the "Coach" section, likely under the "Focus" or "Control" tabs, or directly recommended by the AI on the Prime Dashboard.
- **Media Playback:** Ensure seamless integration of video players and high-resolution image/diagram viewers.
- **Engagement:** Diagrams could have interactive elements (e.g., zoom, pan, overlay drawing tools if feasible).

- **Clear Call to Action:** Each recommendation should clearly state what the user should "watch," "study," or "visualize."
- **Contextual Display:** Recommendations should be presented prominently when relevant (e.g., after a round where focus or strategic errors were noted).

This specification provides the necessary details for developers to implement "Visual Drills," aligning with FoCoCo Prime's commitment to VARK-aligned and AI-driven personalized coaching.
