Focus. Confidence. Control.

Project: App1 - GOLF

Subject: VARK - Focus - Read/Write - MASTER List Content

Version: 1.8.5

Prepared by: Dirk J. Delfortrie

Shared with: Imad Bouirmane

Date: July 3, 2025

Focus Pillar: Read/Write (R/W) Content Delivery for Developers

1. Structured Focus Checklists

- **Purpose:** Actionable, text-based bullet-point lists for pre-shot routines, mid-round focus resets, and other focus-enhancing processes.
- **Content Needed:**
 - **Core Checklist Templates:** Standard text-based templates for various scenarios (e.g., "Pre-Shot Routine," "Mid-Round Reset," "Post-Mistake Protocol," "Putting Focus"). These templates should include placeholders for AI-driven personalization.
 - **Actionable Steps:** Specific, concise written instructions for each step within a routine or reset.
 - **Key Reminders:** Short, impactful mental prompts (e.g., "Stay present," "Trust the process").

2. Detailed AI-Generated Insights

- **Purpose:** Comprehensive, multi-paragraph text analyses of focus patterns, with explanations and actionable steps.
- **Content Needed (for AI Training/Generation):**
 - **Sports Psychology Principles:** Foundational knowledge base on focus, concentration, attentional control, and mental resilience, structured in a way the AI can draw from (textual format).

- **Example Insight Structures:** Templates for how observations, explanations, and actionable steps should be presented in text.
- **Vocabulary/Phrasing:** Glossary of terms related to focus and performance for consistent AI output.

3. Journaling Prompts for Focus

- **Purpose:** AI-generated, targeted text prompts for detailed written reflection on focus challenges and strategies.
- **Content Needed:**
 - **Core Prompt Categories:** Defined categories of focus-related prompts (e.g., "Post-Mistake Reflection," "Focus During Pressure," "Routine Adherence," "Distraction Management").
 - **Prompt Stems:** Base text for prompts with clear placeholders for AI personalization (e.g., "Reflect on your focus during [SCENARIO]. Write about...").
 - **Keywords/Concepts:** List of focus-related terms the AI should use to generate relevant prompts and to analyze responses (e.g., "distracted," "committed," "flow," "overthinking," "routine").

4. Article Summaries

- **Purpose:** AI-rephrased summaries of articles or guides on focus techniques from sports psychology.
- **Content Needed:**
 - **Curated Articles/Guides (Full Text):** A library of high-quality, relevant articles, research papers, and guides on various focus techniques from reputable sports psychology sources. The AI will process these.
 - **Summary Structuring Guidelines:** Rules for the AI on how to summarize (e.g., identify key takeaways, actionable strategies, provide concise explanations, maintain readability).

5. Written Strategy Planners

- **Purpose:** Text-based templates for users to write down their focus strategy for each round or specific holes.
- **Content Needed:**

- **Planner Template Structures:** Defined text-based templates for different planning scenarios (e.g., "Round Focus Strategy," "Specific Hole Focus Plan," "Practice Session Focus").
- **Input Field Labels/Prompts:** Clear, written labels and guiding questions for each section of the planner (e.g., "Overall Focus Theme for This Round:", "Key Mental Cues for This Hole:", "If I Make a Mistake Here:").
- **Example Responses:** (Optional but helpful for AI guidance) A few examples of how users might fill in sections of the planner.

6. Key Phrase Highlights

- **Purpose:** Important focus-related concepts highlighted within text summaries and insights.
- **Content Needed:**
 - **Glossary of Key Focus Concepts:** A definitive list of terms and phrases that the AI should identify and highlight (e.g., "present moment awareness," "controlling the controllable," "process over outcome," "attentional control," "mental reset," "trigger word," "commitment," "letting go").
 - **Highlighting Rules:** Specification of how these phrases should be highlighted (e.g., always bold, specific color for concepts vs. actions).

7. Interactive Quizzes

- **Purpose:** Short written quizzes within modules to test understanding of focus concepts, with immediate text-based feedback.
- **Content Needed:**
 - **Question Bank (Initial):** A starting set of multiple-choice, true/false, and short-answer questions related to fundamental focus concepts.
 - **Correct Answers:** The correct answer for each question.
 - **Feedback Text (for each answer):** Specific, educational text to be displayed for both correct and incorrect answers, explaining the reasoning or pointing back to relevant concepts.
 - **Quiz Module Structure:** Define how quizzes are integrated (e.g., after an article summary, at the end of a learning module).

8. "Focus Log" Templates

- **Purpose:** Structured journaling templates to log instances of good and poor focus, along with contributing factors.
- **Content Needed:**
 - **Log Template Structure:** Pre-defined text fields and categories for logging focus events (e.g., "Date," "Hole/Situation," "Type of Focus Event," "My Mental State," "Contributing Factors (Internal/External)," "Strategies Attempted," "Outcome/Impact," "Lessons Learned").
 - **Dropdown Options:** (If applicable) Lists of text options for specific fields (e.g., "Type of Focus Event" (Loss of Focus, Maintained Strong Focus), "My Mental State" (Frustrated, Calm, Distracted)).

9. Study Guides

- **Purpose:** Detailed written guides on how different variables impact focus on the course, with suggested adjustments.
- **Content Needed (for AI Training/Generation):**
 - **Variable Categories:** Define the variables to be covered (e.g., "Wind," "Rain," "Heat," "Cold," "Fatigue," "Pressure," "Slow Play," "Playing Partners," "Course Type").
 - **Impact Principles:** Detailed textual explanations of *how* each variable typically impacts focus from a sports psychology perspective.
 - **Adjustment Strategies:** A library of proven written strategies and mental techniques for managing the impact of each variable.
 - **Practice Recommendations:** Descriptions of relevant written drills or checklists that can be used for preparation.

10. AI-Enhanced Journal Analysis

- **Purpose:** AI provides written feedback and insights based on the sentiment and content of written journal entries related to focus.
- **Content Needed (for AI Training/Feedback Generation):**
 - **Sentiment Dictionaries:** Lists of words and phrases associated with various sentiments (positive, negative, neutral, frustrated, confident, etc.) within a golf context.
 - **Thematic Keywords/Phrases:** Comprehensive lists of keywords related to common focus challenges and successes in golf journaling.

- **Feedback Templates:** Structured text templates for AI-generated feedback, including sections for observations, sentiment insights, key themes, actionable steps, and cross-referencing.
- **Causality Inference Rules:** (Advanced) Rules or patterns for the AI to infer potential cause-and-effect relationships from the user's narrative (e.g., "If user mentions 'wind' and 'distracted,' suggest strategy X").
