

The 8 Core MindCoach Templates

These are **fixed containers**. AI can personalize *delivery* but cannot invent new containers.

Template 01: Pre-Round Clarity

- **When used:** Before tee-off / warm-up / first tee nerves
- **Goal:** Clear intention, reduce noise, commit to a simple plan
- **Primary pillar:** Focus
- **Allowed cues:** 🙏 Deep Breath, 🎯 Visualization, 🗣️ Trigger Word

Template 02: Pre-Shot Focus

- **When used:** Standing over the ball / decision moment
- **Goal:** Task attention + committed decision
- **Primary pillar:** Focus
- **Allowed cues:** 🎯 Visualization, 🗣️ Trigger Word, 💬 Self-Talk

Template 03: Between-Shots Reset

- **When used:** Walking/ride to ball, waiting, slow play
- **Goal:** Stay neutral, stop rumination, keep attention clean
- **Primary pillar:** Control
- **Allowed cues:** 🔄 Reset, 🙏 Deep Breath

Template 04: Post-Shot Letting Go

- **When used:** Immediately after a shot (good or bad)
- **Goal:** Release outcome attachment and return to neutral
- **Primary pillar:** Control
- **Allowed cues:** 🙌 Letting Go, 🔄 Reset, 🙏 Deep Breath

Template 05: Mistake Recovery

- **When used:** After a miss, penalty, double, or mental spiral
- **Goal:** Regain clarity and composure fast; stop the bleeding
- **Primary pillar:** Control (+ Confidence support)
- **Allowed cues:**  Reset,  Self-Talk,  Letting Go

Template 06: Pressure Moments

- **When used:** High-stakes shot, match play, closing holes, being watched
- **Goal:** Calm commitment under tension
- **Primary pillar:** Confidence (+ Control support)
- **Allowed cues:**  Trigger Word,  Deep Breath,  Self-Talk

Template 07: Momentum Protection

- **When used:** Playing well / after birdie / protecting a score
- **Goal:** Prevent rushing, relaxation, or “don’t mess up” thinking
- **Primary pillar:** Confidence (+ Focus support)
- **Allowed cues:**  Visualization,  Trigger Word,  Self-Talk

Template 08: End-of-Round Reflection

- **When used:** Post-round / later that day
- **Goal:** Turn the round into learning; reduce judgment; create a next-step plan
- **Primary pillar:** All (Focus, Confidence, Control)
- **Allowed cues:** (No new cue type required) use structured reflection + existing cue references

1. Core Mental Lesson Framework (Foundational)

These are the **non-negotiable learning pillars** the AI is built on.

Focus · Confidence · Control

Each pillar includes:

- Definition (plain language, no “psychology” wording)
- What it looks like **on the course**
- What breaks it
- How it shows up in decisions, routines, and shots
- What to do **in the moment**, not theory

2. MindCoach Session Types (Short, Actionable Routines)

We designed **repeatable session formats** the AI can both:

- deliver to users
- and learn from user interaction with them

Session categories created:

- **Pre-Round Clarity**
- **Pre-Shot Focus**
- **Between-Shots Reset**
- **Post-Shot Letting Go**
- **Pressure Moments**
- **Momentum Protection**
- **Mistake Recovery**
- **End-of-Round Reflection**

Each session has:

- Intent (why it exists)

- Trigger moment (when it's used)
- Cue language
- Expected behavioral response

3. Mental Cue Library (Structured + Emoji-Locked)

This is **hard data**, not fluff.

Confirmed cues the AI learns from:

- 🧘 Deep Breath
- 💬 Self-Talk
- 🎯 Visualization
- 🗣️ Trigger Word
- 🙌 Letting Go
- 🔄 Reset

Each cue is linked to:

- Routine type (Pre-Shot, Post-Shot, etc.)
- Mental state before
- Mental state after
- Performance outcome trends

4. Routine Type Framework

Locked and consistent across the app:

- ⌚ Pre-Round
- 📐 Pre-Shot

- 🧘 Post-Shot
- 🚶 Between Shots

The AI learns:

- Which routines stabilize users
- Which routines break under pressure
- How routine timing affects performance

5. Mindset Rating System

User-reported, standardized, repeatable.

- 🧠 Peak Focus
- 😌 Calm & In Control
- 😐 Neutral
- 😞 Distracted or Unsettled
- 🤪 Scattered or Overwhelmed

The AI learns:

- Transitions between states
- What cues cause positive shifts
- What conditions cause breakdowns

6. Performance Tracker Sessions

Each logged round/session captures:

- Cues used
- Routines applied

- Mental state
- Context (course, conditions, pressure)
- Outcome patterns (not shot-by-shot chaos)

7. Voice-First Logging (JustTalk)

We created:

- 480+ NLP training phrases
- Structured parsing rules
- Categorization logic (mental / performance / combined)

The AI learns from:

- Natural language
- Tone + intent
- Repetition patterns
- How golfers actually *think and speak* mid-round

8. Reflection & Insight Sessions

Post-round and post-session reflections are structured so the AI can learn:

- What users *noticed*
- What they *felt worked*
- What broke down
- What they want to improve next

This feeds:

- AI Insights
- Pattern recognition
- Personalized guidance

9. VARK-Based Lesson Variants

We created full content direction for:

- Visual
- Aural
- Read/Write
- Kinesthetic

Across **all three pillars**.

The AI learns:

- How different users absorb guidance
- Which formats lead to better retention and application

10. Ethical & Language Constraints (Critical)

We explicitly trained FoCoCo to:

- Avoid medical or therapeutic claims
- Avoid “psychology” language
- Stay performance-focused
- Be supportive, not diagnostic
- Guide, not judge
